New Business Models for Sustainable Fashion Miguel Angel Gardetti, Esben Rahbek Gjerdrum Pedersen, 2022-02-13 The fashion industry has not traditionally been associated with definitions of sustainable development and sustainability. The social and environmental challenges faced by the fashion industry concern the entire supply and demand chain propped up by a throwaway consumer culture. In response to these sustainability challenges, some fashion companies have developed innovative social and environmental initiatives. While many of these initiatives are sympathetic, resourceful, and hold real potential for generating social and environmental improvements, greater scale and scope is needed in order to bring about a more fundamental shift in current practices. This Special Issue of the Journal of Corporate Citizenship explores how sustainability can be a driver for exploring new business models within a single industrial setting, highlighting some of the sustainability initiatives that bring hope for a more sustainable future. *New Business Models for Sustainable Fashion* is a must read for researchers and practitioners tackling the challenges of an industry in need of large scale transformation. **A**

Alison Gwilt introduces the key issues associated with the production, use, and disposal of fashion clothing and gives step by step guidance on how to identify and evaluate the potential impacts of a garment during the design process. With innovative examples of best practice from international designers and brands, the chapters follow each key stage in the life cycle of a fashion garment and explore approaches such as low impact textiles, techniques, mono materiality, zero waste techniques, upcycling, repair and maintenance techniques, and closed loop design systems.
