Biohackers Magazine Issue 17 , When one experiences a new product a new treatment or a new idea there s little that compares to the feelings of excitement and hope that rush in fueling one s faith in the upright direction of humanity I just recently attended the 8th Annual Biohacking Conference hosted by Dave Asprey in LA and like each biohacking event I left feeling inspired to say the least Everything I saw every person I met and every biohack I experienced further fed my appetite to share these great ideas and practices with the world a world hungry for the opposite approach of industrialized medicine Now of course not every biohack is exactly 100% proven Suffice it to say there are many that are still in the process of collecting data from studies and clinical trials However those that have stood up to the modern pill popping regimes and have adamantly supported their ideas on the foundations of strong scientific data are truly examples to be held in high regard I was impressed with the many products and companies at the conference that held a mission of dedicated service to fellow mankind Yes like in any startup industry or even industry for that matter there are those who are looking to push some falsehood to scheme people into buying their product or services But as we know the companies that rise to the top are those that stick to the cardinal virtues that make up all of us Prudence Justice Fortitude and Temperance The Biohacking Industry is outgrowing its mold and soon a new layer of enthusiasts will be

added This is something that should enthrall us but it shouldn't permit us to lose sight of the foundational attributes that make and will continue to make us biohackers for the rest of our lives Essentially we are all after freedom freedom from disease freedom from injury freedom from hysteria and freedom from aging Responsible Biohacking is perhaps the best way towards that freedom and we must continually adjust our sails to catch the winds that stem from truth and service That is what we at Biohackers Magazine strive towards serving the community through the provision of information carefully discerned and attuned to the values of sincerity and science *The Midlife Woman's Guide to Thriving* Dr I

Davidson,2015-05-10 Table of Contents Prelude Identifying Fitness Biohacking Chapter 1 Nutrition Exercise you have to realize this much You need to know that not every person has the same physical and chemical characteristics as the other and to achieve optimal health you must have an open mind that could induce flexibility in your thinking The last three paragraphs are the basic ground rules that should be in your mind if you plan on transforming your health into something worth showing off The exact techniques to do this have been explained in the book so read on Biohacking Human Limits

Biohackers Magazine Issue 9 Biohackers Magazine , The importance of continual self improvement and development cannot be understated especially in the world of biohacking But there is also something that cannot be overstated in this

same realm of personal health and growth and that is the vital role that women play. Often argued and affirmed as the more intuitive of the 2 sexes, women have and continue to push themselves and their community towards their health, wellness, and wisdom goals. In a lot of ways, men have it easy. Our bodies instruction manual is comparable to a generic IKEA coffee table's guided instructions, not a lot to decipher. But some could compare women's bodies manuals to NASA's rocket construction directions, a lot of steps and A LOT to understand. Granted, the woman's body is easily the more attractive of the two in my opinion, and I want it to be clear that although this statement is biased, I mean this as a more aesthetic art-like manner. The symmetry, the intricacy, the mysteriousness, the gracefulness, just the way everything connects. Perhaps it's because of this clear advantage in the beauty category that it takes a lot to master all the processes within it. It once was said that in the beginning, God first made man, but then afterwards, he took a long look at him and then told himself, "I can do better than that," and then made woman. Women are at the forefront of biohacking, and it's clear that the industry would not be where it is today without them. Due to women having to figure out all of their complexities but also having the tenacity and courage to do so, they have stood side by side with men and helped to share the helpful and needed knowledge of health optimization with the world. It is with great pleasure and respect that we dedicate this issue to all of the women in the world striving to promote good health, strong lives, and clearer minds. Although we have had and will continue to have female authors and subject matter in past and future issues, every article contained inside this particular issue is either written by a female author or purely feminine in subject matter. This is our way to take a moment to highlight and thank all those women out there doing their thing. At Biohackers Magazine, we believe, no, we know that every woman's thought and word is just as important as every man's. And we are here to provide this magazine as the ontic evidence to that. Without further ado, enjoy your new womanful issue.

Biohackers Magazine , First impressions seem to always get the better of us Quick judgments about others ourselves and our communities never seem to cease making their presence known in our minds Psychologically these initial assumptions and impressions that our mind receives are tactics our mind uses as a means of survival sometimes aligning with our intuition to help us determine what or who is going to be helpful or harmful But we must be careful here Our mind is equipped to handle countless sensations and thoughts and due to this we sometimes get so bogged down by this demanding busy world that we take the easy way out and make a judgment based solely on superficial knowledge without any deeper reflection or analysis The world is fast paced and although our mind does well to keep up it needs to be able to consciously recognize that our health both individual and as human beings is dependent on the strive to understand oneself and the other with empathy and compassion COVID 19 has shed a new spotlight on the increasing mental health crisis that is facing our world and I believe that one of the main causes is careless thinking that leads to quick assumptions to save oneself the time of research and contemplation Don t let others think for you Yes respect those with the authority to offer professional opinions but don t be a follower be a student and learn from every experience When your health seems to suffer don t assume the worst When someone comes at you the wrong way don t write them off as a heartless soul When you have a tough interaction with someone representing another community don t assume that everyone else is like that Instead look for the best in yourself others and the community There is the power behind the phrase Love thy neighbor When we treat every person that we come across as our neighbor we break down the prideful barriers that
