Greek Gold from Hellenistic Egypt Michael Pfrommer, 2001. Although much is left to the imagination, the basic facts do come to light and the facets and surfaces of the Getty's golden treasure enrich us with new understanding. **BOOK JACKET** **Nile into Tiber: Egypt in the Roman World** Laurent Bricault, Miguel John Versluys, Paul G.P. Meyboom, 2006-12-01. Interest in all kinds of interactions between Egypt and Rome has grown considerably over the last decade. This debate has not only altered our views on the impact of Rome on Alexandria and Egypt but also strongly put to the fore the reverse direction of this cultural interaction: Egyptian influences on the Roman world. It is this topic, Egypt in the Roman World, that was central to the 13th International Conference of Isis Studies held in Leiden in May 2005. This book, a selection of the papers delivered at the conference, gives a clear overview of the debate as it has developed in recent years. In two parts: I Interpretations of the meaning of Aegyptiaca Romana and II Understanding the cults of Isis in their local context, preceded by a general introduction, it offers a broad perspective on the various aspects of cultural interaction between Egypt and Rome, also by bringing together different research traditions in this field.

Triangular Landscapes Katherine Blouin, 2014. Between the Roman annexation of Egypt and the Arab period, the Nile Delta went from consisting of seven branches to two, namely the current Rosetta and Damietta branches. For historians, this may look like a slow process, but on a geomorphological scale, it is a rather fast one. How did it happen? How did human action contribute to the phenomenon? Why did it start around the Roman period? And how did it impact on ancient Deltaic communities? This volume reflects on these questions by focusing on a district of the north-eastern Delta called the Mendesian Nome. The Mendesian Nome is one of the very few Deltaic zones documented by a significant number of papyri. To date, this documentation has never been subject to a comprehensive study. Yet it provides us with a wealth of information on the region's landscape, administrative geography and agrarian economy. Starting from these papyri and from all available evidence, this volume investigates the complex networks of relationships between Mendesian environments, socio-economic dynamics and agro-fiscal policies. Ultimately, it poses the question of the otherness of the Nile Delta within Egypt and more broadly the Roman Empire. Section I sets the broader hydrological, documentary and historical contexts from which the Roman period Mendesian evidence stems. Section II is dedicated to the reconstruction of the Mendesian landscape, while section III examines the strategies of diversification and the modes of valorization of marginal land attested in the nome. Finally, section IV analyses the socio-environmental crisis that affected the nome in the second half of the second century AD. **Cités et royaumes dans l'Orient hellénistique** Henri-Louis Fernoux, 2003-10-01.
