To live is to face problems and to find solutions for them We do so consciously or unconsciously using intuition reason imagination and many other faculties We notice a situation we draw conclusions from what we see hear and feel and we act on our conclusions in a constant process of observation analysis and remedy My shoulders are tight because I am under a lot of stress I need a good massage We observe a problem tight shoulders analyse the cause stress and seek a remedy for it the massage But what if we have misunderstood the problem What if our description of the problem is based on false perceptions or our analysis on false assumptions What if the solution aggravates the problem This book is about our suppositions habits and behaviours It is about posture and attitude tension and relaxation movement and rest It is about interpersonal relationships sports and performing arts Above all it is about embodied emotions and the body that thinks and feels In this fully revised new edition Pedro de Alcantara invites you to redefine the meaning of health and wellbeing using the insights and tools developed by a man of genius F M Alexander
