Algo Superficial A Bit Skin Deep:

Mammographic Image Analysis R. Highnam, J.M. Brady, 2012-12-06 Breast cancer is a major health problem in the Western world where it is the most common cancer among women Approximately 1 in 12 women will develop breast cancer during the course of their lives Over the past twenty years there have been a series of major advances in the management of women with breast cancer ranging from novel chemotherapy and radiotherapy treatments to conservative surgery The next twenty years are likely to see computerized image analysis playing an increasingly important role in patient management As applications of image analysis go medical applications are tough in general and breast cancer image analysis is one of the toughest There are many reasons for this highly variable and irregular shapes of the objects of interest changing imaging conditions and the densely textured nature of the images Add to this the increasing need for quantitative information precision and reliability very few false positives and the image processing challenge becomes quite daunting in fact it pushes image analysis techniques right to their limits
