Palladium Assisted Alkylation of Olefins with Carbanions Robert Earl Williams (Jr.), 1980 *Mono-Olefins* F. Asinger, 2013-10-22 *Mono Olefins Chemistry and Technology* is a translation from the German and deals with the study of olefins from low ethylene to hexenes and olefins from the high hexenes to eicosenes The book describes the gaseous or low boiling olefins and the higher normally liquid olefins which have only a minor role in applications in the chemical industry The olefins are considered important as they are added in the distillation of off gases in refineries Although the liquid olefins are used sparingly these are needed to manufacture lubricants synthetic detergents and the higher aliphatic alcohols The book then explains the three processes used to separate olefin containing mixtures of gases into fractions by the C number or to convert olefins in the pure state distillation absorption and adsorption The author then describes the processes in manufacturing carburetor fuel from petroleum and natural gases Petroleum oil is a mixture of paraffinic naphthenic and aromatic hydrocarbons and has no olefins The text describes the complete process of refining petroleum into different products such as gasoline kerosene lubricants and spotting benzenes Then the book explains the polymerization of olefins to produce carburetor fuels either by the thermal method or catalytic method The text notes some research made into double bond isomerization in mono olefins and their possible applications This book is beneficial to industrial chemists researchers technical designers and engineers whose works are related with oil refinery and fossil fuels *Friedel-Crafts and Related Reactions: Alkylation and related reactions. 2 v* George Andrew Olah, 1963 **Ionic Liquid Catalyzed Reactions** Zhimin Liu, Yanfei Zhao, 2025-05-12 Understand the applications of ionic liquid catalysis with this cutting edge overview Ionic liquids have distinctive properties that have made them the subject of vigorous research in recent decades They have primarily been seen as potential green alternatives to volatile organic solvents and therefore as a vital tool in the development of sustainable industry In fact however ionic liquids can also serve as catalysts catalyst immobilizers and initiators with the result that they have been applied in over 100 known types of chemical reactions *Ionic Liquid Catalyzed Reactions Green Concepts and Sustainable Applications* offers a detailed overview of these reactions and the catalytic mechanism of ionic liquids It surveys cutting edge research into ionic liquid catalysis and the concepts perspectives and skills needed for scientists to incorporate it into a range of experimental fields It is a must own for anyone looking to understand the range and variety of uses for ionic liquid catalysis *Ionic Liquid Catalyzed Reactions* readers will also find Case studies throughout showing ionic liquid catalysis applications Information for scientists working in organic chemistry electrochemistry biotechnology and many more Detailed coverage of reactions including CO₂ conversion biomass transformation organic synthesis and many others *Ionic Liquid Catalyzed Reactions* is ideal for catalytic chemists organic chemists environmental chemists electrochemists and anyone else

Pujadó, 2006-01-11 This handbook describes and discusses the features that make up the petroleum refining industry It begins with a description of the crude oils and their nature and continues with the saleable products from the refining processes with a review of the environmental impact There is a complete overview of the processes that make up the refinery with a brief history of those processes It also describes design technique operation and in the case of catalytic units the chemistry of the reaction routes These discussions are supported by calculation procedures and examples sufficient to enable input to modern computer simulation packages Sulphuric Acid Extraction Methods for Determining Olefins and Aromatics in Hydrocarbon Oils - Optimum Conditions and Concentrations of Acid C.
