## **Becoming Evil How Ordinary People Commit Genocide Mass Killings:**

Becoming Evil James Waller, 2002-06-27 Political or social groups wanting to commit mass murder on the basis of racial ethnic or religious differences are never hindered by a lack of willing executioners In *Becoming Evil* social psychologist James Waller uncovers the internal and external factors that can lead ordinary people to commit extraordinary acts of evil Waller debunks the common explanations for genocide group think psychopathology unique cultures and offers a more sophisticated and comprehensive psychological view of how anyone can potentially participate in heinous crimes against humanity He outlines the evolutionary forces that shape human nature the individual dispositions that are more likely to engage in acts of evil and the context of cruelty in which these extraordinary acts can emerge Illustrative eyewitness accounts are presented at the end of each chapter An important new look at how evil develops *Becoming Evil* will help us understand such tragedies as the Holocaust and recent terrorist events Waller argues that by becoming more aware of the things that lead to extraordinary evil we will be less likely to be surprised by it and less likely to be unwitting accomplices through our passivity

***Becoming Evil : How Ordinary People Commit Genocide and Mass Killing*** James E. Waller, 2007-03-22 The first edition of *Becoming Evil* spoke unforgettably to a world shell shocked by 9 11 that faced a new war on terror against members of an Axis of Evil With this second edition James Waller brings us up to date on some of the horrific events he used in the first edition to illustrate his theory of extraordinary human evil particularly those from the perennially troubled Balkans and Africa pointing out steps taken both forward and back Nearly a third of the references are new reflecting the rapid pace of scholarship in Holocaust and genocide studies and the issue of gender now occupies a prominent place in the discussion of the social construction of cruelty Waller also offers a reconfigured explanatory model of evil to acknowledge that human behavior is multiply influenced and that any answer to the question Why did that person act as he or she did can be examined at two levels of analysis the proximate and the ultimate Bookended by a powerful new foreword from Greg Stanton vice president of the International Association of Genocide Scholars and a devastating postscript that addresses current outbreaks of genocide and mass killing this new edition demonstrates that genocide is a problem whose time has not yet passed but Waller's clear vision gives hope that at least we can begin to understand how ordinary people are recruited into the process of destruction

**Genocide, Mass Atrocity, and War**

**Crimes in Modern History** James Larry Taulbee, 2017-02-06 Defining genocide as an international crime this two volume set provides a comparative study of historical cases of genocide and mass atrocity clearly identifying the factors that produced the attitudes and behaviors that led to them discusses the reasons for rules in war and examines how the five principles laid out in the Geneva Conventions and other international agreements have functioned in modern warfare Written by an expert on international politics and law *Genocide Mass Atrocity and War Crimes in Modern History* Blood and Conscience is an easy to understand resource that explains why genocides and other atrocities occur why humanity saw the need to create rules that apply during war and how culture rules about war and the nature of war intersect The first volume addresses the history and development of the normative regime s that define genocide and mass atrocity Through a comparative study of historical cases that pay particular attention to the factors involved in producing the attitudes and behaviors that led to the incidents of mass slaughter and mistreatment the author identifies the reasons that genocides and mass atrocities in the 20th century were largely ignored until the early 1990s and why even starting then responses were inconsistent The second book discusses why rules in war exist which factors may lead to the adoption of rules what defines a war crime and how the five fundamental principles laid out in the Geneva Conventions and other international agreements have actually functioned in modern warfare It also poses and answers the interesting question of why we should obey rules when our opponents do not The final chapter examines what actions could serve to identify future situations in which mass atrocities may occur and identifies the problems of timely humanitarian intervention in international affairs

**Nazi Eugenics** Melvyn Conroy, 2017-09-19 Conceived as the answer to all of mankind s seemingly insoluble health and social problems and promoted as a substitute for orthodox religious beliefs the pseudoscience of eugenics recruited disciples in many countries during the latter years of the nineteenth and early years of the twentieth centuries Nowhere was this doctrine more enthusiastically endorsed than in Germany where the application of eugenic theory received its most fervent support A program born of what were often contradictory opinions began under Nazi rule with the compulsory sterilization of thousands of Germany s citizens before morphing into the mass murder of the most vulnerable of the state s own population under the guise of so called euthanasia before ultimately escalating into a continent wide policy of extermination of those who did not fit the Nazi eugenic template The progress of this inexorable descent into barbarity was marked by successive stages of development From the practical application of euthanasia through the organization dedicated to it later on called Aktion T4 and the killing centers that this institution spawned to the centrality of Aktion T4 to Aktion Reinhardt and the Holocaust important elements of the historical record can be seen to emerge How did it happen What impact has it had on contemporary society And what of the character and fate of the individuals involved in the gestation and implementation of this murderously inhumane quasi religion These deceptively simple questions require complex and often disturbing answers as shown by Melvyn Conroy in this important work

**Re-Entering Old Spaces** Aleksandra Nikcevic-Batricevic,2016-05-11 This book is a product of the XI International Conference on English Language and Literary Studies held in Montenegro in 2014 The old spaces were taken as a metaphorical tool for reintroducing a wide range of established topics with new approaches Space was thus understood as physical mechanical continuous linear as measurable and symbolic as subjective and relational and as aesthetic It was found on maps in architecture on theatre stages in books in hearts in one's identity in time and in theses and theories from the Aristotelian topos to Einstein's construct of space time Therefore the means of travel to these spaces and the forms the journeys take are also multifarious However so are the discursive strategies and their limitations when it comes to presenting the journeys and their destinations The contributors to this volume represent a range of nationalities and present research that either follows in the footsteps of other authors in a literal or secondary literary journey to real geographical places or observes the universal literary and old theoretical issues through new critical lenses Indeed they are often on both roads witnessing how inextricable human efforts are to finding identifying and aestheticising oneself in relation to a particular space Their contributions to this book expose how spaces were created and recreated through writing and symbolical representations in general They also show how the images of these spaces have been changing in consent to the intentions of their visitors and reveal that persistent and obstinate moment in a space that despite or in spite of changing perspectives itself refuses to be changed The book will encourage for further contributions to this expanding field in the humanities In their numerous and distinct ways the contributions to this particular book maintain that understanding how spaces are conceived and conceptualised is of pronounced importance in the globalized world in which cultures are gradually losing authenticities while their spaces geographical tourist spiritual literary aesthetic are as reflective of the visitors as they are of the hosts
