Britain 1846 1964 The Challenge Of Change:

Britain, 1846-1964 Martin Roberts, 2001 The aim of this book is to explain how Britain's circumstances changed between 1846 1964 Britain in 1846 was by far the richest nation in the world In 1964 Britain was comparatively much less rich than the USA and though amongst the world's richest nations was losing ground to Japan and to Western Europe Because of her wealth and her navy Britain in 1846 was the most powerful nation in the world Britain in 1964 was dwarfed by the superpowers of the USA and the USSR The British Empire of the 1840s reflected Britain's power By 1964 the Empire was collapsing Only one in five men and no women could vote in the Britain of 1840s By 1964 Britain was fully democratic with all adults entitled to vote In a period of a little over a century these were some of the changes to which Britain had to adapt It was a period that marked a substantial fall in Britain's comparative power and prosperity in the world **AQA**

Strittmatter, 2023-03-09 This book explores commemoration practices and preservation efforts in modern Britain focusing on the years from the end of the First World War until the mid 1960s The changes wrought by war led Britain to reconsider major historical episodes that made up its national narrative Part of this process was a reassessment of heritage sites because such places carry socio political meaning as do the memorials that mark them This book engages the four way intersection of commemoration preservation tourism and urban planning at some of the most notable historic locations in England The various actors in this process from the national government and regional councils to private organizations and interested individuals did nothing less than engineer British national memory The author presents case studies of six famous British places namely battlefields Hastings and Bosworth political sites Runnymede and Peterloo and world s fairgrounds the Crystal Palace and Great White City In all three genres of heritage sites one location developed through commemorations and tourism while the other anti sites simultaneously faltered as they were neither memorialized nor visited by the masses Ultimately the book concludes that the modern social and political environment resulted in the revival creation or erasure of heritage sites in the service of promoting British national identity A valuable read for British historians as well as scholars of memory public history and cultural studies the book argues that heritage emerged as a discursive arena in which British
