Why Architects Matter Flora Samuel, 2018-03-09 Why Architects Matter examines the key role of research led ethical architects in promoting wellbeing sustainability and innovation It argues that the profession needs to be clear about what it knows and the value of what it knows if it is to work successfully with others Without this clarity the marginalization of architects from the production of the built environment will continue preventing clients businesses and society from getting the buildings that they need The book offers a strategy for the development of a twenty first century knowledge led built environment including tools to help evidence develop and communicate that value to those outside the field Knowing how to demonstrate the impact and value of their work will strengthen practitioners ability to pitch for work and access new funding streams This is particularly important at a time of global economic downturn with ever greater competition for contracts and funds driving down fees and making it imperative to prove value at every level Why Architects Matter straddles the spheres of Practice Management and Law History and Theory Design Housing Sustainability Health Marketing and Advice for Clients bringing them into an accessible whole The book will therefore be of interest to professional architects architecture students and anyone with an interest in our built environment and the role of professionals within it **The British Architect** ,1911
