British Secret Projects Jet Fighters Since 195:

British Secret Projects 3 Tony Buttler, 2004 8 1 2 x 11 180 b w photos This title completes a trilogy covering the design and development of British fighters and bombers from the end of the biplane era to the present day This new volume again emphasizes the designs that were never flown It covers aircraft projects that were prepared from the mid 1930s onwards and that were influenced by the growing threat of another war with Germany through to some projects which appeared after the war was over The latter includes early jets such as the Attacker Sea Hawk and Venom which all flew post war but were designed to wartime or immediate post war requirements Among the designs featured in this book are fixed gun fighters turret fighters twin engine cannon fighters light medium and heavy bombers torpedo bombers and flying boats As in the trilogy s first two volumes these designs are covered with detailed descriptions and data and numerous photographs of models or artists impressions showing how these designs would have looked Unlike the post war years details of many earlier unbuilt projects have been lost but fortunately information on a great number of these has survived and this will form the most complete record to be published on these fascinating machines *British Secret Projects* Tony Buttler, 2003 The design and development of British bombers since WWII is covered in depth Utilizes recently declassified archives to reveal little known facts about special bomber development projects Covers the design backgrounds for the V Bomber program Canberra Buccaneer Avro 730 TSR 2 Harrier Jaguar and Tornado Contains many previously unpublished illustrations plus specially commissioned artworks of prototypes in contemporary markings *Air Pictorial* , 2002 Spitfire, Mustang and the 'Meredith Effect' Peter Spring, 2024-04-04 Examines the life of the remarkable and controversial F W Meredith an individual who has largely been forgotten by history despite the brilliant advances he made which helped the Allies win the war against Hitler s Third Reich By the mid 1930s the obstacles to high speed that aircraft designers faced included the question of cooling the engine This was a big challenge that those working on the new fast aeroplanes entering service as the war clouds gathered over Europe had to consider as the drag from the system increased as a square of the speed Ducted systems were designed which lowered drag but these were based on the assumption that the system was cold This ignored the potential energy from the air heated by the radiator for liquid cooled aircraft and from the discharged engine exhaust gases It took a profoundly lateral thinker to harness the possibilities of the paradox that heat could cut the cost of cooling That thinker was the British engineer Frederick William Meredith A researcher at the Royal Aircraft Establishment at Farnborough until 1938 F W Meredith a key player in the UK s development of the autopilot and remote controlled aircraft His contribution to Allied success in the Second World War was enormous but incredibly he was also a known a Soviet agent Few would doubt that the Supermarine Spitfire was a pioneering aeroplane not because it was an all metal monoplane with retractable undercarriage and enclosed cockpit as these were not unique but because it was the first to incorporate a Meredith designed ducted cooling system This was intended from the beginning to use heat to create negative drag In

practice the Spitfire's design was flawed as Meredith himself pointed out and did not fully use what became known as the Meredith Effect. Meredith also made entirely overlooked but extremely important contributions to resolving the problem of how to induce air smoothly into cooling ducts at high speeds without which, as the Spitfire demonstrated, ducted cooling systems worked sub-optimally. The first aeroplane properly to exploit the Meredith Effect was the North American P-51 Mustang, this being a very significant factor as to why it was 30mph faster than the Spitfire when both had the same Rolls Royce Merlin engine. This book by Peters Spring examines the life of the remarkable and controversial F.W. Meredith, an individual who has largely been forgotten by history despite the brilliant advances he made, advances which helped the Allies win the war against Hitler's Third Reich. Flying Magazine, 1977-09 Air Force Magazine, 1981 **Major Events of the Nuclear Age** Erik V. Nordheim, 1967 **The Secret History of World War II** Neil Kagan, Stephen Garrison Hyslop, 2016. From spy missions to code breaking, this richly illustrated account of the covert operations of World War II takes readers behind the battle lines and deep into the undercover war effort that changed the course of history. From the authors who created *Eyewitness to World War II* and numerous other best-selling illustrated reference books, this is the shocking story behind the covert activity that shaped the outcome of one of the world's greatest conflicts and the destiny of millions of people. National Geographic's landmark book illuminates World War II as never before by taking you inside the secret lives of spies and spy masters, secret agents and secret armies, Enigma machines and code breakers, psychological warfare and black propaganda, secret weapons and secret battle strategies. Seven heavily illustrated narrative chapters reveal the truth behind the lies and deception that shaped the secret war; eight essays showcase hundreds of rare photos and artifacts many never before seen; more than 50 specially created sidebars tell the stories of spies and secret operations. Renowned historian and top-selling author Stephen Hyslop reveals this little-known side of the war in captivating detail, weaving in extraordinary eyewitness accounts and information only recently declassified. Rare photographs, artifacts and illuminating graphics enrich this absorbing reference book. *The Encyclopedia of American Aircraft* Anthony Robinson, 1979. Over 800 illustrations over 1200 aircraft types. **The Economist yearbook : 1992 in review.** Economist, 1993.
