technological innovations drove up the costs of competing at the top ranks racers were forced to rely on sponsors who commercialized and ultimately gained control of the sport The end result Charters argues was the marginalization of the amateur competitor and of the CASC itself Based on extensive research into the CASC s records and dozens of interviews with former competitors and officials The Chequered Past opens a window into the rich but virtually unknown history of the auto sport and claims for it a place in Canadian sports history Lawrie Bond, Microcar Man Nick Wotherspoon,2017-06-30

Once a common sight on Britain s roads few people today seem to have heard of the Bond Minicar not a diminutive gadget laden conveyance for the fictional 007 character but a popular practical motorcycle engined three wheeler that in the post war austerity period gave tens of thousands of people affordable personal transport at a time when conventional vehicles were beyond the reach of the average household Yet whilst the later mostly imported Bubble cars have remained in the public eye it is largely forgotten that the first of the postwar Microcars to go into significant production was the British designed and built Bond Equally enigmatic seems to be the designer of this vehicle Lawrence Lawrie Bond a prolific automotive design genius with a penchant for weight saving construction techniques He was responsible for a wide range of two three and four wheel vehicles from ultra lightweight motorcycles and scooters such as the Minibyke Lilliput and Gazelle as well as his other Microcars the stylish Berkeley and perhaps less than pretty Opperman Unicar and finally to his later work including the innovative but troubled Bond 875 and styling the Equipe GT sportscar Here the story is told in full covering all Lawrie s innovative designs and the various vehicles that bore his name all in prolifically illustrated detail together with his passion for motor racing which resulted in a number of technically acclaimed racing cars some of which can still be seen competing in historic racing events today **A History of Organizational Change** Hans Erik Næss,2020-07-13 This book is the first independent exploration of the Fédération Internationale de l'Automobile s FIA institutional history Virtually unexamined compared with similar institutions like the FIFA and the IOC the FIA has nevertheless changed from being a small association in 1904 to becoming one of the world s most influential sport governing bodies Through chronologically organised chapters this book explains how the FIA manages to link together motorsport circuses like Formula 1 with the automotive industry and societal issues like road safety and environmental sustainability In an exciting narrative spanning seven decades it reviews the FIA s organisational turning points governing controversies political dramas and sporting tragedies Considering the FIA to be a unique type of hybrid organisation characterised by what the author calls organisational emulsion this case study contains theoretical innovations relevant to other studies of sport governing bodies It makes an empirically grounded contribution to the research fields of institutional logics historical sociology and sport governance **Cars & Parts** ,1983 **Road and Track** ,1983
