The British Carrier Strike Fleet after 1945 David Hobbs, 2015-10-30. A comprehensive study of the bittersweet post-WWII history of British naval aviation will become a standard reference for its subject. Firetrench. In 1945, the most powerful fleet in the Royal Navy's history was centered on nine aircraft carriers. This book charts the post-war fortunes of this potent strike force, its decline in the face of diminishing resources, its final fall at the hands of uncomprehending politicians, and its recent resurrection in the form of the Queen Elizabeth class carriers, the largest ships ever built for the Royal Navy. After 1945, experts prophesied that nuclear weapons would make conventional forces obsolete, but British carrier-borne aircraft were almost continuously employed in numerous conflicts as far apart as Korea, Egypt, the Persian Gulf, the South Atlantic, East Africa, and the Far East, often giving successive British Governments options when no others were available. In the process, the Royal Navy invented many of the techniques and devices crucial to modern carrier operations: angled decks, steam catapults, and deck landing aids, while also pioneering novel forms of warfare like helicopter-borne assault and tactics for countering such modern plagues as insurgency and terrorism. This book combines narratives of these poorly understood operations with a clear analysis of the strategic and political background, benefiting from the author's personal experience of both carrier flying and the workings of Whitehall. It is an important but largely untold story of renewed significance as Britain once again embraces carrier aviation. Makes a timely and welcome appearance; will make compelling reading for those with serious concern for our naval affairs. St Andrews in Focus.

The British Communist Party and the Trade Unions, 1933-1945 Nina Fishman, 2021-02-27. This is a pathbreaking book, essential reading for students of interwar political and social history. Previous histories of the period have underestimated the crucial role which Communists played in trade union organisation from top to bottom. Despite its relatively small size, the Communist Party occupied a strategic place in the trade union movement; the leaders of the movement, notably Ernest Bevin, refused to acknowledge this at the time. Thanks to her extensive research and numerous interviews, and to the opening of the books of the Communist Party, Nina Fishman has been able to uncover a fascinating story, one which official Communist historians have never told and which other historians could only recount in fragments. The main protagonists are the Communist Party General Secretary Harry Pollitt and the Editor of the Daily Worker, Johnny Campbell. The book brings to vivid life the work of activists on the

shop floor and in the coalmines during the Depression and the Second World War The book includes the first comprehensive analysis of Communist activity in key sectors of the British economy notably in engineering shop stewards movements and among London busmen It concludes with an authoritative review of Communists part in the British war economy and a vigorous challenge to the conventional wisdom about the effect of Communist Party changes of line on the war on activists abilities to incite and lead strikes
