British Social Attitudes Public Policy Social Ties:

British Social Attitudes Alison Park, John Curtice, Katarina Thomson, Catherine Bromley, Miranda Phillips, 2004 The 21st Report summarizes and interprets data from the most recent survey and makes comparisons with findings from previous years *British Social Attitudes 18* John Curtice, Katarina Thomson, Lindsey Jarvis, Catherine Bromley, Nina Stratford, 2001 The indispensable annual British Social Attitudes survey compiles describes and comments on a range of current social attitudes The series charts changes in British social values with annual surveys carried out from a nationwide sample of around 3 500 people by the National Centre for Social Research's team of interviewers The 18th Report summarizes and interprets data from the most recent survey and makes comparisons with findings from previous years The Rolls Royce of opinion surveys The Times **British Social Attitudes: Public Policy, Social Ties - The 18th Report** National Centre for Social Research (Great Britain), Cohabitation Great Britain: Law Commission, 2006-05-31 This consultation paper considers options for reform of the current law in relation to the property and financial rights of cohabiting couples either opposite sex or same sex couples when a relationship ends Although the paper does discuss the situation in relation to when one of the partners dies it focuses on whether a new scheme is needed to provide financial remedies on separation when a relationship breaks down Amongst the provisional proposals the Committee identifies the need for the introduction of new statutory remedies to address the separation of cohabiting couples who have children however the situation for cohabitants without children is found to raise more difficult social policy questions and the views of consultees are sought about their eligibility within the proposed scheme Other proposals include that courts should be given discretion in determining financial claims on separation rather than having fixed rules for property division based on principles of the contributions of both parties to the joint household and to the welfare of dependent children both before and after separation with the provision for an opt out agreement for couples under the proposed statutory scheme Responses to the proposals should be received by 30th September 2006 and a final report is due to be published by August 2007 An overview document summarising the key issues considered is available separately ISBN 011730266X British Public Opinion and Party Policy Towards European Integration, 1973-2016 Stuart Smedley, 2025-03-18 This book provides the first detailed historical account of British public opinion and party policy towards European integration from 1973 the year in which the UK joined the European Community to 2016 the year in which the UK voted to leave the European Union It takes a thematic approach towards this subject exploring party policy and public opinion towards significant developments in the European integration process during the period covered These include moves towards deeper and flexible integration economic and monetary union the Single Market enlargement and foreign and defence policy cooperation The author assesses the nature of British public opinion towards these developments some of which Britain's government and main political parties supported and others which they opposed and analyses the extent to which party policies reflected public opinion Friend v. Friend Ethan J. Leib, 2011-01-07

Friendship is one of our most important social institutions. It is not only the salve for personal loneliness and isolation; it is the glue that binds society together. Yet for a host of reasons—longer hours at work, the Internet, suburban sprawl—many have argued that friendship is on the decline in contemporary America. In social surveys, researchers have found that Americans on average have fewer friends today than in times past. In *Friend v Friend*, Ethan J. Leib takes stock of this most ancient of social institutions and its ongoing transformations and contends that it could benefit from better and more sensitive public policies. Leib shows that the law has not kept up with changes in our society: it sanctifies traditional family structures but has no thoughtful approach to other aspects of our private lives. Leib contrasts our excessive legal sensitivity to marriage and families with the lack of legal attention to friendship and shows why more legal attention to friendship could actually improve our public institutions and our civil society. He offers a number of practical proposals that can support new patterns of interpersonal affinity without making friendship an onerous legal burden. An elegantly written and highly original account of the changing nature of friendship, *Friend v Friend* upends the conventional wisdom that law and friendship are inimical and shows how we can strengthen both by seeing them as mutually reinforcing.

Family Secrets Deborah Cohen, 2017. What did families hide in the past and why? By delving into the familial dynamics of shame and guilt, *Family Secrets* investigates the part that families so often regarded as the agents of repression have played in the transformation of social mores from the Victorian era to the present day.

The English Question Robert Hazell, 2006-08-22. This book analyses the English Question: does England need to find its own political voice following devolution to Scotland and Wales, or are the English content to muddle through?

Fertility, Living Arrangements, Care and Mobility John Stillwell, Ernestina Coast, Dylan Kneale, 2009-06-12. Many parts of the world are experiencing rapid demographic restructuring, resulting in an ageing population with increasingly significant work and care pressures on cohorts less able or willing to provide support. This book examines some of the important trends that have underpinned reductions in fertility, including delayed child bearing and increased childlessness. It demonstrates how relationships between partners have resulted in new living arrangements with changing attitudes from marriage to cohabitation as the social norm, and it considers the health and well-being for particular at-risk groups such as the elderly and stepparents, as well as aspects of mobility such as household migration and commuting to school. The book brings together a series of studies that all involve quantitative analyses of secondary data from censuses, surveys, or administrative records. The trends and patterns reported provide new and interesting insights into behaviour of the household and the roles of adults and children and point to questions of critical importance for practitioners and policy makers.
