

The world of bats

By the end of the book, as even by the end of this introduction, I hope to have convinced you that bats are amazing creatures. In the only mammals with powered flight, they are physiologically, ecologically, and behaviorally unique. Found everywhere but Antarctica, one out of every five mammal species is a bat. This book will immerse you with details of their biology, appearance, and place in the natural world.

I've never read a bat I didn't love. It's not! From those with "interesting" appearances, such as the *Woolly-legged Colonial Bat* on the *U.S. Mammal* (see page 10), have found a bat that has caught my attention. We have been privileged to study bats around the world and to share our knowledge of them with others. Bats have an unusual and fun life. They are not able to experience and appreciate them as they might look or other animal groups. The bats are everywhere if you know where to look, especially if you pay attention to the night sky at dusk.

Children, if they haven't already been exposed to negative views of bats, are fascinated by them and love to learn about relationships with modified parts of

Nature. Bats that are intensely understood the ecosystem services provided by bats, which gather up agricultural pests like insects and diseases such as some diseases that cause the bat's own death. Nearly all bat behaviors, navigating and feeding based by listening to the complex echoes of their calls. The only bat known without large-scale echolocation (echolocation based upon the existence of sound generated in the brain or "voice box"), the *gray-headed fruit bat*, consumes prey that does not give (chase) and is often located with their sense of smell and memory of feeding sites. Echolocating bats can detect objects as thin as a human hair and smaller of their sound processing abilities have enhanced our own use of radar. Despite previous myths about bats, they are not blind and their navigation is aided by excellent sight vision.

04 • Great gray-headed fruit bat.
This bat is the most common bat in the United States.
It is a common sight in the night sky at dusk.
All over the world, the bat's
habitat is the fruit of the *Persea* plant,
or the night-blooming cactus.
