Corruption, Protection and Justice in Medieval Europe Jonathan R. Lyon, 2022-11-24 What was an advocate Latin advocatus German Vogt in the middle ages What responsibilities came with the position and how did they change over time With this ground breaking study Jonathan R Lyon challenges the standard narrative of a medieval Europe of feudalism and lordship being replaced by a modern Europe of government bureaucracy and the state By focusing on the position of advocate he argues for continuity in corrupt practices of justice and protection between 750 and 1800 This book traces the development of the role of church advocate from the Carolingian Period onwards and explains why this position became associated with the violent abuse of power on churches estates When other types of advocates became common in and around Germany after 1250 including territorial and urban advocates they were not officeholders in developing bureaucracies Instead they used similar practices to church advocates to profit illicitly from their positions calling into question scholarly arguments about the decline of violent lordship and the rise of governmental accountability in European history
