

A silhouette of a person stands with their back to the camera, arms outstretched horizontally. They are positioned in the lower center of the frame. The background is a sunset or sunrise scene with a warm orange and yellow glow. A semi-transparent dark rectangle is overlaid on the upper two-thirds of the image, containing white text. The overall mood is contemplative and inspirational.

The real question is
not whether life
exists after death.
The real question is
whether you are alive
before death.

Be Alive:

The Monodoxy Cometan, Astronist Institution, 2019-03-02 The Monodoxy is a 275 000 word long philosophical disquisition categorised as the first of twelve disquisitions that when considered collectively form The Omnidoxy the founding treatise of the philosophy of Astronism established by Cometan The disquisition comprises of hundreds of discourses which are themselves titled by rubrals and written according to a style and structure known as insentence The Monodoxy s authorship solely rests with Cometan the first Millettic philosopher and the founder of Astronism whom began writing The Monodoxy at the age of just seventeen through what he termed as personal inspiration The Monodoxy has been said to formulate the thematic identity of the philosophy of Astronism due to its prominent focus on the elements progeny and phenomena of The Cosmos in a distinct way to all the other eleven disquisitions forming The Omnidoxy Hundreds of new schools of thought disciplines of study and philosophical belief orientations hold their roots in The Monodoxy in addition to thousands of new terms concepts and theories which hold a distinguished originality and Cometanic style combined with an Astronic identity There are a total of fifty three discourses which constitute The Monodoxy each of which holds its own special title known as a rubral which are used to provide overviews of the discourses to which they are associated The Complete Works of C. H. Spurgeon, Volume 39 Spurgeon, Charles H., Volume 39 Sermons 2289 2341 Charles Spurgeon 19 June 1834 31 January 1892 is one of the church s most famous preachers and Christianity s foremost prolific writers Called the Prince of Preachers he was one of England s most notable ministers for most of the second half of the nineteenth century and he still remains highly influential among Christians of different denominations today His sermons have spread all over the world and his many printed works have been cherished classics for decades In his lifetime Spurgeon preached to more than 10 million people often up to ten times each week He was the pastor of the congregation of the New Park Street Chapel later the Metropolitan Tabernacle in London for 38 years He was an inexhaustible author of various kinds of works including sermons commentaries an autobiography as well as books on prayer devotionals magazines poetry hymns and more Spurgeon was known to produce powerful sermons of penetrating thought and divine inspiration and his oratory and writing skills held his audiences spellbound Many Christians have discovered Spurgeon s messages to be among the best in Christian literature Edward Walford wrote in Old and New London Volume 6 1878 quoting an article from the Times regarding one of Spurgeon s meetings at Surrey Fancy a congregation consisting of 10 000 souls streaming into the hall mounting the galleries humming buzzing and swarming a mighty hive of bees eager to secure at first the best places and at last any place at all After waiting more than half an hour for if you wish to have a seat you must be there at least that space of time in advance Mr Spurgeon ascended his tribune To the hum and rush and trampling of men succeeded a low concentrated thrill and murmur of devotion which seemed to run at once like an electric current through the breast of every one present and by this magnetic chain the preacher held us fast bound for about two hours It is not my purpose to give a summary of his

discourse It is enough to say of his voice that its power and volume are sufficient to reach every one in that vast assembly of his language that it is neither high flown nor homely of his style that it is at times familiar at times declamatory but always happy and often eloquent of his doctrine that neither the Calvinist nor the Baptist appears in the forefront of the battle which is waged by Mr Spurgeon with relentless animosity and with Gospel weapons against irreligion cant hypocrisy pride and those secret bosom sins which so easily beset a man in daily life and to sum up all in a word it is enough to say of the man himself that he impresses you with a perfect conviction of his sincerity More than a hundred years after his death Charles Spurgeon s legacy continues to effectively inspire the church around the world For this reason Delmarva Publications has chosen to publish the complete works of Charles Spurgeon

Bogunovic,2013-07-08 In this book it is not my intention to teach anyone but only to incite everyone to think about to speak about and to recommend in order improving life for entire humanity independent of race color ethnicity languages or religion for everyone to become in agreement according to its given gift which is powerful Spirit of love what we call talent It is not my idea that proves that but myriad of humans as modern prophets that by their work witnessed for real life directed by the powerful Spirit of love call talent is only one way only one direction toward goodness for entire humanity which pleases only One whom we call Great Creator We may call it as universal secular religion or secular ideology as you wish which is universal and founded on free gift given talent and responsibility while divine religion is religion of individuals gathered in the congregation founded on faith and obedience while both are blessed with the power of love It is true and is easy to understand that life that is directed by the given talent as a life purpose for the love toward One who sent you to do it and for devoted love for entire humanity as a fulfillment of first law to love your Great Creator and not only your neighbor but entire humanity to be like sun that shine from above for all and rain that comes for above for all as a HEAVENLY WISDOM An end I would like to hear from you about your opinion and suggestion in order to further improve that given program suggested from many and for goodness for entire humanity *Capture-Recapture: Parameter Estimation for Open Animal Populations* George A. F. Seber,Matthew R. Schofield,2019-08-13 This comprehensive book rich with applications offers a quantitative framework for the analysis of the various capture recapture models for open animal populations while also addressing associated computational methods The state of our wildlife populations provides a litmus test for the state of our environment especially in light of global warming and the increasing pollution of our land seas and air In addition to monitoring our food

resources such as fisheries we need to protect endangered species from the effects of human activities e g rhinos whales or encroachments on the habitat of orangutans Pests must be controlled whether insects or viruses and we need to cope with growing feral populations such as opossums rabbits and pigs Accordingly we need to obtain information about a given population s dynamics concerning e g mortality birth growth breeding sex and migration and determine whether the respective population is increasing static or declining There are many methods for obtaining population information but the most useful and most work intensive is generically known as capture recapture where we mark or tag a representative sample of individuals from the population and follow that sample over time using recaptures resightings or dead recoveries Marks can be natural such as stripes fin profiles and even DNA or artificial such as spots on insects Attached tags can for example be simple bands or streamers or more sophisticated variants such as radio and sonic transmitters To estimate population parameters sophisticated and complex mathematical models have been devised on the basis of recapture information and computer packages This book addresses the analysis of such models It is primarily intended for ecologists and wildlife managers who wish to apply the methods to the types of problems discussed above though it will also benefit researchers and graduate students in ecology Familiarity with basic statistical concepts is essential
