Algebraic and Differential Topology of Robust Stability Edmond A. Jonckheere, 1997 In this book two seemingly unrelated fields algebraic topology and robust control are brought together The book develops algebraic differential topology proceeding from an easily motivated control engineering problem showing the relevance of advanced topological concepts and reconstructing the fundamental concepts of algebraic differential topology from an application oriented point of view It is suitable for graduate students in engineering and or applied mathematics and academic researchers Plurality and Continuity David A.J. Seargent, 2012-12-06 by D M Armstrong In the history of the discussion of the problem of universals G F Stout has an honoured and special place For the Nominalist meaning by that term a philosopher who holds that existence of repeatables kinds sorts type and the indubitable existence of general terms is a problem The Nominalist's opponent the Realist escapes the Nominalist's difficulty by postulating universals He then faces difficulties of his own Is he to place these universals in a special realm Or is he to bring them down to earth perhaps turning them into repeatable properties of particulars universalia in res and repeatable relations between universals universalia inter res Whichever solution he opts for there are well known difficulties about how particulars stand to these universals Under these circumstances the Nominalist may make an important concession to the Realist a concession which he can make without abandoning his Nominalism He may concede that metaphysics ought to recognize that particulars have properties qualities perhaps and are related by relations But he can maintain these properties and relations are particulars not universals Nor indeed is such a position entirely closed to the Realist A Realist about universals may and some Realists do accept particularized properties and

Representations of Black Women in the Media Marquita Marie Gammage,2015-10-16 In 1920 W E B Du Bois cited the damnation of women as linked to the devaluation of motherhood This dilemma he argues had a crushing blow on Black women as they were forced into slavery Black womanhood portrayed as hypersexual by nature became an enduring stereotype which did not coincide with the dignity of mother and wife This portrayal continues to reinforce negative stereotypes of Black women in the media today This book highlights how Black women have been negatively portrayed in the media focusing on the export nature of media and its ability to convey notions of Blackness to the public It argues that media such as rap music videos television dramas reality television shows and newscasts create and affect expectations of Black women Exploring the role that racism misogyny and media play in the representation of Black womanhood it provides a foundation for challenging contemporary media s portrayal of Black women **How to Be True** Daisy May

,1977 **The Sociology of Military Science** Colonel (US Army Ret.) Chris Paparone,2012-11-08 This groundbreaking

work challenges modernist military science and explores how a more open design epistemology is becoming an attractive alternative to a military staff culture rooted in a monistic scientific paradigm. The author offers fresh sociological avenues to become more institutionally reflexive to offer a variety of design frames of reference beyond those typified by modern military doctrine. Modernist military knowledge has been institutionalized to the point that blinds militaries to alternative designs organizationally and in their interventions. This book seeks to reconstruct strategy and operations in designing ways and develops theories of action through multifaceted contextualizations and recontextualizations of situations showing that Military Design does not have to rely on set rational analytic decision making schemes but on seeking alternative meanings in and on action. The work offers an alternative philosophy of practice that embraces the unpredictability of tasks to be accomplished. Written by Colonel Paparone U S Army Ret PhD with a special chapter by two active duty officers it will appeal to all in military and security studies including professionals and policymakers.
