

Computerized Accounting Practice Sets

Sage 50 practice sets

An accounting practice set is a real world simulation of a single month in the accounting cycle of a small business.

Perdisco's computerized practice sets require students to complete the accounting cycle using Sage 50 software.

We publish three accounting practice sets that use Sage 50 software: Electronics Specialist, Electronics Specialist with company file download and Corporate Gift Baskets.

Pedagogical design differences between the titles

The pedagogical approach between the practice sets differs, with each practice set intended for a distinct purpose.

1. Electronics Specialist challenges students with a large project that is designed to be completed as a homework activity over a multi-week period. As the most difficult title, this practice set expects students to submit answers and review their feedback, and then independently identify any individual transactions that may be causing discrepancies. Our multimedia resource, the 'Online Learning Center', provides students with significant support but they are still required to problem-solve on their own and to identify and correct any mistakes they may have made in their Sage 50 files.

2. Electronics Specialist with company file download is similar to the Electronic Specialist title above but provides students with the Sage 50 data files, suppliers, inventory, customers, employees and opening balances already pre-filled.

Other than during the company set-up phase, this practice set is as challenging as the standard Electronics Specialist title but takes less time to complete because students are not required to set up their own company file.

3. Corporate Gifts Baskets is significantly easier. It provides more guidance to students to assist them in reaching the correct answers and is explicitly written to be relatively more of a 'learning' task. To build confidence and assist students to check their understanding, additional feedback is provided early in the practice set on key purchase and sale transactions to help students ensure they are making the major entries correctly before working through the detail of their transaction list. Detailed feedback includes a line-by-line break down of each transaction that is recorded in each general ledger account to assist students to quickly and easily identify any mistakes they may have made in their Sage 50 files.

"I liked that fact that it showed you step-by-step how to do some of different tasks in [the software]. It was almost like you had the teacher with you the entire time." (Student, University of South Carolina)

"I liked the story; it was a nice touch to the learning experience. I like how you organized the feedback, it was very organized, and I like the challenge – it was a little more challenging than I expected." (Student, California State University)
