It provides a framework for the issues surrounding AI and offers a variety of perspectives. It contains 24 consistently illustrated contributions examining seminal work on AI from around the world, including the United States, Europe, and Asia. It articulates current theoretical and practical methods, offers critical views on tools and techniques, and suggests future directions for meaningful uses of AI technology. Architects and educators who are concerned with the advent of AI and its ramifications for the design industry will find this book an essential reference. **AI in the Wild** Peter Dauvergne, 2020-09-15
Examining the potential benefits and risks of using artificial intelligence to advance global sustainability, Drones with night vision are tracking elephant and rhino poachers in African wildlife parks and sanctuaries; smart submersibles are saving coral from carnivorous starfish on Australia's Great Barrier Reef; recycled cell phones alert Brazilian forest rangers to the sound of illegal logging. The tools of artificial intelligence are being increasingly deployed in the battle for global sustainability. And yet, warns Peter Dauvergne, we should be cautious in declaring AI the planet's savior.

In *AI in the Wild* Dauvergne avoids the AI industry powered hype and offers a critical view exploring both the potential benefits and risks of using artificial intelligence to advance global sustainability *Empowering AI Applications in Smart Life and Environment* Nour Eldeen Mahmoud Khalifa, Mohamed Hamed N. Environments Bruno Apolloni, Maria Marinaro, Roberto Tagliaferri, 2007-11-04 The book reports the proceedings of the 15th Italian workshop on neural networks issued by the Italian Society on Neural Networks SIREN The longevity recipe of this conference stands in three main points that normally renders the reading of these proceedings so interesting as appealing 1 The topics of the neural networks is considered an attraction pole for a set of researches centered on the inherent paradigm of the neural networks rather than on a specific tool exclusively Thus the subsymbolic management of the data information content constitutes the key feature of papers in various fields such as Pattern Recognition Stochastic Optimization Learning Granular Computing and so on with a special bias toward bioinformatics operational applications An excerpt of all these matters may be found in the book 2 Though managed at domestic level the conference attracts contributions from foreign researchers as well so that in the book the reader may capture the flavor of the state of the art in the international community 3 The conference is a meeting of friends as well Thus the papers generally reflect a relaxed atmosphere where researchers meet to generously exchange their thought and explain their actual results in view of a common cultural growing of the community **Department of Housing and Urban Development, and certain independent agencies appropriations for fiscal year 1986** United States.
