Artillery Hell:

Artillery Hell Curt Johnson, Richard Claire Anderson, 1995 Five essays detail the artillery used by both Union and Confederate forces in the Battle of Antietam near Sharpsburg Maryland in September 1862 The core essay was written in 1940 for the National Park Service but first published here Together they discuss the types and capabilities of the artillery pieces the problems faced by the commanders and what can be conjectured about their placement and engagement Also includes six reports by Union officers just after the battle Annotation copyright by Book News Inc Portland OR **Hell's Islands** Stanley Coleman Jersey, 2008 Presents battlefield accounts and first person narratives from over 200 Allied and Japanese veterans of the battle on Guadalcanal Island between August 1942 and February 1943 *Artillery Hell* Curt Johnson, Richard Claire Anderson, 1995 In *Artillery Hell* Curt Johnson and Richard C Anderson Jr provide a detailed examination of the role of field artillery in the Battle of Antietam Johnson sets the context with an overview of organizational problems confronting the senior artillerists on the eve of a great battle Anderson's clear and concise discussion of different types of artillery guns and their capabilities and ammunition is presented in language accessible not only to military historians but to all those interested in the war and its deadliest single day of battle *Field Artillery*, 1992 **Hell's Highway** George Koskimaki, 2013-05-07 The author of *The Battered Bastards of Bastogne* does a superb job of telling the history the 101st Airborne Division during Operation Market Garden Kepler's Book Reviews *Hell's Highway* is a history most of which has never before been written It is adventure recorded by those who lived it and put into context by an author who was also there It is human drama on an enormous scale told through the personal stories of 612 contributors of written and oral accounts of the Screaming Eagles part in the attempt to liberate the Netherlands Koskimaki is an expert in weaving together individual recollections to make a compelling and uniquely first hand account of the bravery and deprivations suffered by the troops and their hopes fears triumphs and tragedies as well as those of Dutch civilians caught up in the action There have been many books published on Operation Market Garden and there will surely be more This book however gets to the heart of the action The big picture which most histories paint here is just the context for the real history on the ground

Hell's Highway John Antal, George E. Koskimaki, 2008 **Technical Innovation in American History** Rosanne Welch, Peg A. Lamphier, 2019-02-22 From the invention of eyeglasses to the Internet this three volume set examines the pivotal effects of inventions on society providing a fascinating history of technology and innovations in the United States from the earliest European colonization to the present *Technical Innovation in American History* surveys the history of technology documenting the chronological and thematic connections between specific inventions technological systems individuals and events that have contributed to the history of science and technology in the United States Covering eras from colonial times to the present day in three chronological volumes the entries include innovations in fields such as architecture civil engineering transportation energy mining and oil industries chemical industries electronics computer and information

technology communications television radio and print agriculture and food technology and military technology The A Z entries address key individuals events organizations and legislation related to themes such as industry consumer and medical technology military technology computer technology and space science among others enabling readers to understand how specific inventions technological systems individuals and events influenced the history cultural development and even self identity of the United States and its people The information also spotlights how American culture the U S government and American society have specifically influenced technological development **Civil War Field Artillery** Earl J.

Hess,2022-10-05 The American Civil War saw the creation of the largest most potent artillery force ever deployed in a conflict fought in the Western Hemisphere It was as sizable and powerful as any raised in prior European wars Moreover Union and Confederate artillery included the largest number of rifled pieces fielded in any conflagration in the world up to that point Earl J Hess s Civil War Field Artillery is the first comprehensive general history of the artillery arm that supported infantry and cavalry in the conflict Based on deep and expansive research it serves as an exhaustive examination with abundant new interpretations that reenvision the Civil War s military Hess explores the major factors that affected artillerists and their work including the hardware the organization of artillery power relationships between artillery officers and other commanders and the influence of environmental factors on battlefield effectiveness He also examines the lives of artillerymen the use of artillery horses manpower replacement practices effects of the widespread construction of field fortifications on artillery performance and the problems of resupplying batteries in the field In one of his numerous reevaluations Hess suggests that the early war practice of dispersing guns and assigning them to infantry brigades or divisions did not inhibit the massing of artillery power on the battlefield and that the concentration system employed during the latter half of the conflict failed to produce a greater concentration of guns In another break with previous scholarship he shows that the efficacy of fuzes to explode long range ordnance proved a problem that neither side was able to resolve during the war Indeed cumulative data on the types of projectiles fired in battle show that commanders lessened their use of the new long range exploding ordnance due to bad fuzes and instead increased their use of solid shot the oldest artillery projectile in history
