Austin, 2003-08-15 A personal story of the ways in which persistence chance and creativity interact in biomedical research This first book by the author of *Zen and the Brain* examines the role of chance in the creative process James Austin tells a personal story of the ways in which persistence chance and creativity interact in biomedical research the conclusions he reaches shed light on the creative process in any field Austin shows how in his own investigations unpredictable events shaped the outcome of his research and brought about novel results He then goes beyond this story of serendipity to propose a new classification of the varieties of chance drawing on his own research and examples from the history of science including the famous accidents that led Fleming to the discovery of penicillin Finally he explores the nature of the creative process considering not only the environmental and neurophysiological correlates of creativity but also the role of intuition in both scientific discoveries and spiritual quests This updated MIT Press paperback edition includes a new introduction and recent material on medical research creativity and spirituality *Rats, Lice and History* Hans Zinsser, 2017-07-28 When *Rats Lice and History* appeared in 1935 Hans Zinsser was a highly regarded Harvard biologist who had never written about historical events Although he had published under a pseudonym virtually all of his previous writings had dealt with infections and immunity and had appeared either in medical and scientific journals or in book format Today he is best remembered as the author of *Rats Lice and History* which gone through multiple editions and remains a masterpiece of science writing for a general readership To Zinsser scientific research was high adventure and the investigation of infectious disease a field of battle Yet at the same time he maintained a love of literature and philosophy His goal in *Rats Lice and History* was to bring science philosophy and literature together to establish the importance of disease and especially

epidemic infectious disease as a major force in human affairs Zinsser cast his work as the biography of a disease In his view infectious disease simply represented an attempt of a living organism to survive From a human perspective an invading pathogen was abnormal from the perspective of the pathogen it was perfectly normal This book is devoted to a discussion of the biology of typhus and history of typhus fever in human affairs Zinsser begins by pointing out that the louse was the constant companion of human beings Under certain conditions to wash or to change clothing lice proliferated The typhus pathogen was transmitted by rat fleas to human beings who then transmitted it to other humans and in some strains from human to human Rats Lice and History is a tour de force It combines Zinsser s expertise in biology with his broad knowledge of the humanities And Nothing Happened...But You Can Make It Happen! Washington,2008-01-08 NATIONAL BOOK CRITICS CIRCLE AWARD WINNER The first full history of Black America s shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment No one concerned with issues of public health and racial justice can afford not to read this masterful book Washington has unearthed a shocking amount of information and shaped it into a riveting carefully documented book New York Times From the era of slavery to the present day starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted Medical Apartheid details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge a tradition that continues today within some black populations It reveals how Blacks have historically been prey to grave robbing as well as unauthorized autopsies and dissections Moving into the twentieth century it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks Shocking new details about the government s notorious Tuskegee experiment are revealed as are similar less well known medical atrocities conducted by the government the armed forces prisons and private institutions The product of years of prodigious research into medical journals and experimental reports long undisturbed Medical Apartheid reveals the hidden underbelly of scientific research and makes possible for the first time an understanding of the roots of the African American health deficit At last it provides the fullest possible context for comprehending the behavioral fallout that has

caused Black Americans to view researchers and indeed the whole medical establishment with such deep distrust Coming to My Senses George Caspar Homans, 2017-07-05 Those interested in the development of scientific theory and in the nature of academic life will appreciate this intellectual autobiography written by one of America's leading sociologists Following his family tradition The Education of Henry Adams was written by his great uncle George Caspar Homans describes how his ideas about the proper nature of theory in social science both in form and content have developed over time The chief interest of the book lies in the description of this process Homans career has spanned many of the key periods of development in social research and his own work has been central to the process He was the first major sociologist to outline the sociological implications of psychologists work on learning or behavior theory His contributions to modern sociology have had a major impact on the study of small groups the problem of theory and methods of theory construction and the study of basic characteristics of social behavior He is regarded as the father of social exchange theory Homans considers academic and intellectual as well as nonacademic influences on his development personalities of highly idiosyncratic individuals against whose views of culturalism functionalism and structuralism he reacted discussions with colleagues reading as well as his ancestry his childhood in Boston his literary education and later social life in Boston and his experiences as a sea captain in the Navy in World War II This is an absorbing book both an autobiography and a history of the development of the social sciences in the post World War II era *Rats, Lice and History* Hans Zinsser, 2007-01-01 Originally published Boston Printed and Pub for the Atlantic Monthly Press by Little Brown and Company 1935 *Epidemics and Genocide in Eastern Europe, 1890-1945* Paul Weindling, 2000-02-03 During the First World War delousing became routine for soldiers and civilians following the recent discovery that the louse carried typhus germs But how did typhus come to be viewed as a Jewish disease and what was the connection between the anti typhus measures during the First World War and the Nazi gas chambers in the Second World War In this powerful book Professor Weindling draws upon wide ranging archival research throughout East and Central Europe to the United States to provide valuable new insight into the history of German medicine from its response to the perceived threat of typhus epidemics from its Eastern borders He examines how German experts in tropical medicine took an increasingly racialised approach to bacteriology regarding supposedly racially inferior peoples as carriers of the disease So they came to view typhus as a Jewish disease By the Second World War as migrants and deportees had become conditioned to expect the ordeal of delousing at border crossings ports railway junctions and on entry to camps so sanitary policing became entwined with racialisation as the Germans sought to eradicate typhus by eradicating the perceived carriers Typhus had come to assume a new and terrifying genocidal significance as the medical authorities sealed the German frontiers against diseased undesirables from the east and gassing became a favoured means of disease eradication
