Conversion of Former BTW Facilities Erhard Geissler, Lajos G. Gátsó, Ernst Buder, 2012-12-06 The development production stockpiling and use in war of biological and toxin weapons are prohibited by international law Although not explicitly stated the two treaties outlawing such activities the Geneva Protocol of 1925 and the Biological and Toxin Weapons Convention of 1972 prohibit the continuation of activities previously performed in Biological and Toxin Weapons facilities not justified for prophylactic protective or other peaceful purposes Because conversion and other means of cessation of former BTW facilities are not explicitly addressed in the treaties mentioned above the problems involved in conversion of BTW facilities have thus far only been discussed marginally in the open literature In times of increased awareness of the danger of biological and toxin warfare including the increased danger of terrorist use of biological and toxin weapons it seemed necessary to us to invite experts from different parts of the world to discuss the pros and cons of conversion and the problems involved It also became obvious to us that the conversion of former BTW facilities should be discussed with respect to the necessity of peaceful international cooperation in areas related to the Biological and Toxin Weapons Convention An additional reason to discuss matters of peaceful cooperation is that cooperation is explicitly requested by Article X of the Biological and Toxin Weapons Convention
