Artificial Intelligence And Cognitive Science:

Artificial Intelligence and Cognitive Science Andy Clark, Josefa Toribio Mateas, 1998 **Artificial Intelligence D. Sleeman, N. O. Bernsen, 2019-12-06** Originally published in 1992 this title reviews seven major subareas in artificial intelligence at that time knowledge acquisition logic programming and representation machine learning natural language vision the design of an AI programming environment and medicine a major application area of AI This volume was an attempt primarily to inform fellow AI workers of recent European work in AI It was hoped that researchers in sister disciplines such as computer science and linguistics would gain a deeper understanding of the assumptions techniques and tools of contemporary AI Readings in Cognitive Science Allan Collins, Edward E. Smith, 2013-10-02 *Readings in Cognitive Science A Perspective from Psychology and Artificial Intelligence* brings together important studies that fall in the intersection between artificial intelligence and cognitive psychology This book is composed of six chapters and begins with the complex anatomy and physiology of the human brain The next chapters deal with the components of cognitive science such as the semantic memory similarity and analogy and learning These chapters also consider the application of mental models which represent the domain specific knowledge needed to understand a dynamic system or natural physical phenomena The remaining chapters discuss the concept of reasoning problem solving planning vision and imagery This book is of value to psychologists psychiatrists neurologists and researchers who are interested in cognition **Artificial Intelligence and Cognitive Science , Cognitive Science and Artificial Intelligence** Sasikumar Gurumoorthy, Bangole Narendra Kumar Rao, Xiao-Zhi Gao, 2017-12-22 This book presents interdisciplinary research on cognition mind and behavior from an information processing perspective It includes chapters on Artificial Intelligence Decision Support Systems Machine Learning Data Mining and Support Vector Machines chiefly with regard to the data obtained and analyzed in Medical Informatics Bioinformatics and related disciplines The book reflects the state of the art in Artificial Intelligence and Cognitive Science and covers theory algorithms numerical simulation error and uncertainty analysis as well novel applications of new processing techniques in Biomedical Informatics Computer Science and its applied areas As such it offers a valuable resource for students and researchers from the fields of Computer Science and Engineering in Medicine and Biology **Artificial Intelligence and Creativity** T. Dartnall, 1994-08-31 Creativity is one of the least understood aspects of intelligence and is often seen as intuitive and not susceptible to rational enquiry Recently however there has been a resurgence of interest in the area principally in artificial intelligence and cognitive science but also in psychology philosophy computer science logic mathematics sociology and architecture and design This volume brings this work together and provides an overview of this rapidly developing field It addresses a range of issues Can computers be creative Can they help us to understand human creativity How can artificial intelligence AI enhance human creativity How in particular can it contribute to the sciences of the artificial such as design Does the new wave of AI connectionism geneticism and artificial life offer more promise in these

areas than classical symbol handling AI What would the implications be for AI and cognitive science if computers could not be creative These issues are explored in five interrelated parts each of which is introduced and explained by a leading figure in the field Prologue Margaret Boden Part I Foundational Issues Terry Dartnall Part II Creativity and Cognition Graeme S Halford and Robert Levinson Part III Creativity and Connectionism Chris Thornton Part IV Creativity and Design John Gero Part V Human Creativity Enhancement Ernest Edmonds Epilogue Douglas Hofstadter For researchers in AI cognitive science computer science philosophy psychology mathematics logic sociology and architecture and design and anyone interested in the rapidly growing field of artificial intelligence and creativity

Foundational Issues in Artificial Intelligence and Cognitive Science

Mark H. Bickhard, L. Terveen, 1995-03-07 The book focuses on a conceptual flaw in contemporary artificial intelligence and cognitive science Many people have discovered diverse manifestations and facets of this flaw but the central conceptual impasse is at best only partially perceived Its consequences nevertheless visit themselves as distortions and failures of multiple research projects and make impossible the ultimate aspirations of the fields

The impasse concerns a presupposition concerning the nature of representation that all representation has the nature of encodings encodingism Encodings certainly exist but encodingism is at root logically incoherent any programmatic research predicted on it is doomed to distortion and ultimate failure The impasse and its consequences and steps away from that impasse are explored in a large number of projects and approaches These include SOAR CYC PDP situated cognition subsumption architecture robotics and the frame problems a general survey of the current research in AI and Cognitive Science emerges Interactivism an alternative model of representation is proposed and examined

The Sciences of Cognition Morton Wagman, 1995-03-30 Wagman presents a general unified theory of artificial and human intelligence under which the nature of human reasoning problem solving analogical thinking and scientific discovery is examined from theoretical research and computational perspectives The work analyzes foundational issues regarding the nature of intelligent systems and intelligence and significant and current research in the area is discussed This book will be of interest to scholars dealing with psychology artificial intelligence and cognitive science

Modern Approaches in Machine Learning and Cognitive Science: A Walkthrough Vinit Kumar Gunjan, Jacek M. Zurada, Balasubramanian Raman, G. R. Gangadharan, 2020-02-04 This book discusses various machine learning cognitive science approaches presenting high throughput research by experts in this area Bringing together machine learning cognitive science and other aspects of artificial intelligence to help provide a roadmap for future research on intelligent systems the book is a valuable reference resource for students researchers and industry practitioners wanting to keep abreast of recent developments in this dynamic exciting and profitable research field It is intended for postgraduate students researchers scholars and developers who are interested in machine learning and cognitive research and is also suitable for senior undergraduate courses in related topics Further it is useful for practitioners dealing with advanced data processing applied mathematicians developers of software for agent oriented systems and developers of embedded and real time systems
