Artistic Differences:

A Theology of Artistic Sensibilities John Dillenberger, 2004-10-19 For most of history argues John Dillenberger the visual arts were for better or worse part of the very fabric of the life and thought of the church But with the Reformation and the Counter Reformation a major change took place Protestant rejection of the visual was matched in Roman Catholicism by the reduction of its formative power While the visual arts dropped out of the lives of Protestant churches they became a memory rather than a source of ennoblement or power in the Roman Catholic Church Thus in different but allied ways Protestants and Catholics lost the power of the visual Part art history part historical theology and part theological reflection this book is both an argument and a program for the recovery of the visual arts in the life of the church for reclaiming seeing as part of religious perception It offers a theological understanding of the visual and provides a basis upon which the visual arts may again be incorporated into Protestantism and reinvigorated in Roman Catholicism The first part is devoted to historical reconstruction exploring those moments in Western history in which the relation between religion and the arts was in ferment Part 2 is given to contemporary delineation and analysis of spiritual perceptions in modern American painting and sculpture of modern church art and architecture and of the changing views of contemporary theologians toward the visual arts Citing David Tracy Karl Rahner Langdon Gilkey and others as examples Dillenberger argues that contemporary theology is moving away from the modern rationalistic understanding of theological analogy to one far closer to the arts Part 3 is constructive developing a theological perspective that demands and includes the visual arts and suggesting ways in which this can be accomplished in pastoral and theological education The world of art says Professor Dillenberger is more aware of the role of religion in the arts than the world of religion is of art Thus it is time for the church to resume its historic association with the visual arts albeit in analogous rather than repristinating ways

Against Art and Culture Liam Dee,2017-12-12 Offering a negative definition of art in relation to the concept of culture this book establishes the concept of art culture to describe the unity of these two fields around named labour idealised creative subjectivity and surplus signification Contending a conceptual and social reality of a combined art culture this book demonstrates that the failure to appreciate the dynamic totality of art and culture by its purported negators is due to almost all existing critiques of art and culture being defences of a true art or culture against inauthentic manifestations and art thus ultimately restricting creativity to the service of the bourgeois commodity regime While the evidence that art culture enables commodification has long been available the deduction that art culture itself is fundamentally of the world of commodification has failed to gain traction By applying a nuanced analysis of both commodification and the larger systems of ideological power the book considers how the surplus of art culture is used to legitimate the bourgeois status quo rather than unravel it It also examines possibilities for a post art culture world based on both existing practices that challenge art culture identity as well as speculations on the integration of play and aesthetics into general social life An out and out negation of art and culture this book offers a unique contribution to the cultural critique landscape *The Measure of Man* Lawrence

Rothfield,2021-03-17 It was one of the most concentrated surges of creativity in the history of civilization Between 1390 and 1537 Florence poured forth an astonishing stream of magnificent artworks But Florentines did more during this brief period than create masterpieces As citizens of a fractious republic threatened from below without and within they also were driven to reimagine the political and ethical basis of their world exploring the meaning and possibilities of liberty virtue and beauty

This vibrant era is brought to life in rich detail by noted historian Lawrence Rothfield in *The Measure of Man*. His highly readable account introduces readers to a city teeming with memorable individuals and audacious risk takers capable of producing works of the most serene beauty and acts of the most shocking violence. Rothfield's cast of characters includes book hunters and book burners, devout Christians and assassins, humble pharmacists and arrogant oligarchs, all caught up in a dramatic struggle, a tragic arc running from the cultural heights of republican idealism in the early fifteenth century through the aesthetic flowerings and civic vicissitudes of the age of the Medici and Savonarola to the brooding meditations of Machiavelli and Michelangelo over the fate of the dying republic.

Outlines for the Study of Art Harry Huntington Powers, Mary Montague Powers, Louise M. Powe, 1911 Rural Artists' Colonies in Europe, 1870-1910 Nina Lübbren, 2001

This ground breaking book presents a critical study of pictorial narrative in nineteenth century European painting. Covering works from France, Germany, Britain, Italy, and elsewhere, it traces the ways in which immensely popular artists like Jean-Léon Gérôme, Karl von Piloty, and William Quiller Orchardson used unique visual strategies to tell thrilling and engaging stories. Regardless of genre, content, or national context, these paintings share a fundamental modern narrative mode. Unlike traditional art, they do not rely on textual sources nor do they tell stories through the human body alone. Instead, they experiment with objects, spaces, cause and effect relations, and open ended ambiguity, prompting viewers and reviewers to read for clues in order to weave their own elaborate tales.
