Ludic Dreaming David Cecchetto,Marc Couroux,Ted Hiebert,Eldritch Priest,2017-02-23 Ludic Dreaming

uses sometimes fictional dreams as a method for examining sound and contemporary technoculture's esoteric exchanges refusing both the strictures of visually dominated logic and the celebratory tone that so often characterizes the sonic turn. Instead through a series of eight quasi-analytical essays on the condition of listening the book forwards a robust engagement with sounds human and nonhuman alike that leverages particularity in its full radical singularity: what is a dream after all if not an incipient physics that isn't held to the scientific demand for repeatability? Thus these studies declare their challenge to the conventions of argumentation and situate themselves at a threshold between theory and fiction, one that encourages reader and writer alike to make lateral connections between otherwise wildly incongruent subjects and states of affairs. Put differently, *Ludic Dreaming* is a how-to book for listening away from the seeming fatality of contemporary technologies which is to say away from the seeming inevitability of late capitalistic nihilism. *The realism of dream visions* Constance B. Hieatt, 2019-01-29. No detailed description available for *The realism of dream visions*. **Place and Dream** Thorsten Botz-Bornstein, 2004. This is a book about space. On a first level it reflects traditional Japanese ideas of space against various items of Western culture. Among these items are Bakhtin's dialogicity, Wittgenstein's *Lebensform* and virtual space or globalized space as representatives of the latest development of an alienated modern spatial experience. Some of the Western concepts of space appear as negative counter-examples to Bashō-like Japanese places; others turn out to be compatible with the Japanese idea of space. On a second level the book attempts to synthesize by constantly transgressing the limits of a purely comparative activity a quantity which the author believes to be existent in Japanese culture that is called the virtual. Be it Kuki Shūzō's hermeneutics of non-foundation or his ontology of dream, Nishida Kitarō's virtual definition of the body of state or Kimura Bin's notion of *in-between aida* that is so closely associated with the virtual space of Noh plays, what all these conceptions have in common is that they aim to transcend a flat notion of reality by developing the virtual as a complex ontological unity.
