Ascetics And Ambassadors Of Christ The Monasteries Of Palestine 314 631:

Ascetics and Ambassadors of Christ John Binns, 1996 The monasteries of the Jerusalem desert were famous throughout the Byzantine Christian world Yet whilst much has been written about their counterparts in Egypt and Syria this book is the first to provide a comprehensive study of the monastic movement in Palestine during the Byzantine period from the accession of Constantine to the fall of Jerusalem to the Persians in 614 The book is divided into three parts The first examines the lives of the holy men of the desert using contemporary source material and looks at the culture which produced them The second describes the environment including chapters on Jerusalem and the expansion of monasticism into other urban centres The third section presents some of the main themes of the saints lives with chapters on the historical development doctrinal debate and spirituality This is an important and valuable contribution to the study of ancient spirituality and desert monasticism and should be of interest both to historians and scholars of patristics and theology

The Sepulchre of Christ and the Medieval West Colin Morris, 2005-03-17 The tomb of Christ at Jerusalem was a vital influence in the making of Western Europe Pilgrimage there influenced the development of society and its structures The desire to bring the Sepulchre to the West in copies or memorials shaped art and religion while the ambition to control Christ's tomb was a central objective of the crusades Western Europe responded to the loss of Jerusalem by creating a new pilgrimage to the East by making kingdoms holy lands for their subjects and by creating new pilgrim centres at home This book brings together social political and religious themes often considered in isolation

The Oxford Illustrated History of the Holy Land Robert G. Hoyland, H. G. M. Williamson, 2018-09-06 The Oxford Illustrated History of the Holy Land covers the 3 000 years which saw the rise of Judaism Christianity and Islam and relates the familiar stories of the sacred texts with the fruits of modern scholarship Beginning with the origins of the people who became the Israel of the Bible it follows the course of the ensuing millennia down to the time when the Ottoman Empire succumbed to British and French rule at the end of the First World War Parts of the story especially as known from the Bible will be widely familiar Less familiar are the ways in which modern research both from archaeology and from other ancient sources sometimes modify this story historically Better understanding however enables us to appreciate crucial chapters in the story of the Holy Land such as how and why Judaism developed in the way that it did from the earlier sovereign states of Israel and Judah and the historical circumstances in which Christianity emerged from its Jewish cradle Later parts of the story are vital not only for the history of Islam and its relationships with the two older religions but also for the development of pilgrimage and religious tourism as well as the notions of sacred space and of holy books with which we are still familiar today From the time of Napoleon on European powers came increasingly to develop both cultural and political interest in the region culminating in the British and French conquests which carved out the modern states of the Middle East Sensitive to the concerns of those for whom the sacred books of Judaism Christianity and Islam are of paramount religious authority the authors all try sympathetically to

show how historical information from other sources as well as scholarly study of the texts themselves enriches our understanding of the history of the region and its prominent position in the world's cultural and intellectual history

What Makes a Church Sacred? Mary Farag, 2021-11-02 If churches belong to no one what is their purpose Mary K Farag persuasively demonstrates that three interest groups cared about this question in late antiquity law makers Christian leaders and wealthy lay persons Most of the time their answers co existed sitting side by side like tectonic plates Yet the plates did not always sit still and it is events on their colliding boundaries that account for familiar Christian controversies in novel ways What Makes a Church Sacred argues that scholarship misunderstands well known religious figures by ignoring the legal issues they faced In this seminal text Farag nuances the scholarly conversations on sacred space gift giving wealth and poverty in the late antique Mediterranean world making use not only of Latin and Greek sources but also Coptic and Arabic evidence

The Church in the Age of Constantine Johannes Roldanus, 2006-09-12 Relating biblical essentials to ancient cosmology and anthropology and providing models for reflection on inculturation this book presents a refined theological screening of the doctrinal and ethical thinking during the fourth century

The Blue Sapphire of the Mind Douglas E. Christie, 2012-12-04 There are no unsacred places the poet Wendell Berry has written There are only sacred places and desecrated places What might it mean to behold the world with such depth and feeling that it is no longer possible to imagine it as something separate from ourselves or to live without regard for its well being To understand the work of seeing things as an utterly involving moral and spiritual act Such questions have long occupied the center of contemplative spiritual traditions In *The Blue Sapphire of the Mind* Douglas E Christie proposes a distinctively contemplative approach to ecological thought and practice that can help restore our sense of the earth as a sacred place Drawing on the insights of the early Christian monastics as well as the ecological writings of Henry David Thoreau Aldo

Leopold Annie Dillard and many others Christie argues that at the most basic level it is the quality of our attention to the natural world that must change if we are to learn how to live in a sustainable relationship with other living organisms and with one another He notes that in this uniquely challenging historical moment there is a deep and pervasive hunger for a less fragmented and more integrated way of apprehending and inhabiting the living world and for a way of responding to the ecological crisis that expresses our deepest moral and spiritual values Christie explores how the wisdom of ancient and modern contemplative traditions can inspire both an honest reckoning with the destructive patterns of thought and behavior that have contributed so much to our current crisis and a greater sense of care and responsibility for all living beings These traditions can help us cultivate the simple spacious awareness of the enduring beauty and wholeness of the natural world that will be necessary if we are to live with greater purpose and meaning and with less harm to our planet *Image and Power in the Archaeology of Early Medieval Britain* Helena Hamerow, Arthur MacGregor, 2017-02-28 Rosemary Cramp's influence on the archaeology of early Medieval Britain is nowhere more apparent than in these essays in her honor by her former students Monastic sites Lindisfarne and Whithorn are the inspiration for Deirdre O'Sullivan's and Peter Hill's papers Chris Loveluck discusses the implications of the findings from the newly discovered settlement at Flixborough in Lincolnshire Nancy Edwards describes the early monumental sculpture from St David's in South Wales Martin Carver reviews the politics of monumental sculpture and monumentality and Catherine Hills reassesses the significance of imported ivory found in graves Richard Bailey Christopher Morris and Derek Craig top and tail the book with tributes to Rosemary Cramp and a bibliography of her work **The Monastic School of Gaza** Brouria Bitton-Ashkelony, Aryeh Kofsky, 2006-02-01 This book studies one of the most striking chapters in the history of late antique monastic culture provided by the monastic legacy of Gaza A monastic intellectual community flourished in the region of Gaza from the fourth to the seventh century producing a wealth of literary works In this diverse and exciting literary corpus especially in the unique correspondence between spiritual leaders and their clientele matters that are usually only hinted at in monastic sources are vividly portrayed Distinct from the dry and matter of fact monastic instructions and the stereotypes of hagiography this corpus exposes the psychological tensions moods frustrations and elations in the daily existence of the monks revealing them as creatures of flesh and blood This book seeks to frame the historical development of this community and endeavours to analyze the spiritual and intellectual context of what may be termed the monastic school of Gaza The legacy of this complex and thriving centre cuts across theological differences and boundaries Shedding light on these neglected educated circles enhances and somewhat balances the overall historical picture of late antique ascetic culture and Palestinian Christianity
