Solongus Hwang, Kyu-ho ,2015-05-28 Solongus is a full length business novel focused on the on going automotive industry in the world Thus it is not a period novel on Turf Fight of Power But it is an epitome of warlike competition on a global product that is a horseless carriage automobile Currently global automakers such as GM Ford Toyota Volks Wagon BMW Benz Renault Fiat Hyundai Tata Chinese Big Four and other dark horses are fiercely competing for the market share in the world to get the popularity from earthlings as if they were Pretenders to the throne in the world Right here their class acts in the borderless battlefield are portrayed art of war in the Heroic Age In the book series their versatile strategies and skilled tactics are also revealed under the shiny commercial slogans of course with their own chariots *Just Dreaming* Joe Amico,2013-01-02 Is the American Dream real Do we have a right to it or is it just suggestion Where did it come from Joseph Amico the son of Sicilian immigrants provides the answers to these key questions in this essay on American history and politics More importantly he explains why the dream is in jeopardy and how it can be saved Raised a Catholic Amico became a skeptic of politics and government after the assassination of President John F Kennedy Later when Martin Luther King Jr and Robert Kennedy were killed he knew something was seriously wrong With the war in Vietnam raging he joined the antiwar and civil rights movements Immersed in the politics of the day he saw only one answer to the nations problems social revolution Now looking both at the history and present state of the US Amico explores what is needed to for the nation to move forward to find a better way of doing things Our political forefathers promoted radical principles that helped the United States and its people prosper While we can still move in that direction it wont happen by listening to radio and television pundits who distort the views of our forefathers We must revisit the principles that our country was founded on and let what we know to be the truth become reality Amico an ordinary citizen seeks to shed some light on this complex subject so that we the people can claim whats rightfully ours instead of just dreaming **Recognitions** Enrico Botta,Gianna Fusco,Pilar Martínez Benedí,Anna Scannavini,2024-11-04 This volume offers a critical exploration of the many ways in which transcodification acts at the intersection of literature art history and social and cultural artifacts to foster instances of recognition in the US Recognition covers a wealth of meanings from the mere acknowledgement of existence validity or legality or appreciation of something as valuable to the identification of something as known or familiar Accordingly this volume deals with different struggles for recognition One focus of the volume is the assessment of artistic achievement in relation to a so called original with essays concerned with cultural codes and with the role that translation adaptation and cross cultural encounters have played in US artistic and literary productions A second parallel strand focuses on the fight for political and social inclusion or on the dynamics beneath the recognition of group and gender identities to explore how activism and artistic literary productions challenge received identity boundaries and accepted social and cultural hierarchies Bringing together recognition and transcodification transculturality the book deconstructs crystalized and codified categories

and celebrates the crossing of boundaries *Maritime Strategy and Sea Denial* Milan Vego, 2018-12-07 This book focuses on the theory and practice of maritime strategy and operations by the weaker powers at sea Illustrated by examples from naval and military history the book explains and analyzes the strategies of the weaker side at sea in both peacetime and wartime in defense versus offense the main prerequisites for disputing control of the sea and the conceptual framework of disputing control of the sea It also explains and analyzes in some detail the main methods of disputing sea control avoiding seeking decisive encounters weakening enemy naval forces over time counter containment of enemy naval forces destroying the enemy's military economic potential at sea attacks on the enemy coast defense of the coast defense capturing important positions basing areas and defense capturing of a choke point A majority of the world's navies are currently of small or medium size In the case of a war with a much stronger opponent they would be strategically on the defensive and their main objective then would be to dispute control of the sea by a stronger side at sea This book provides a practical guide to such a strategy This book would be of much interest to students of naval power maritime security strategic studies and military naval history **About Europe** Denis Guénoun, 2013-02-20 The concept of the universal was born in the lands we now call Europe yet it is precisely the universal that is Europe's undoing All European politics is caught in a tension to assert a European identity is to be open to multiplicity but this very openness could dissolve Europe as such This book reflects on Europe and its changing boundaries over the span of twenty centuries A work of philosophy it consistently draws on concrete events From ancient Greece and Rome to Christianity to the Reformation to the national revolutions of the twentieth century what we today call Europe has been a succession of projects in the name of ecclesia or community Empire Church and EU all have been constructed in contrast to an Oriental other The stakes of Europe then are as much metaphysical as political Redefining a series of key concepts such as world place transportation and the common this book sheds light on Europe as process by engaging with the most significant philosophical debates on the subject including the work of Marx Husserl Heidegger Patočka and Nancy
