complexities of production and those of market restrictions This study a unique blend of analysis history and case studies not only characterizes the essence of car manufacturing but also explains the links between production market conditions and financial results and constraints At the same time it challenges fashionable views on the car industry and rejects the current preference for facile dichotomies e g mass production vs lean production Japan vs America freedom vs regulation However it also shows that the failure of BMC the largest failure in the industry to date cannot be attributed to its incomplete adoption of the best system Ford and Toyota were exceptionally successful in their production organization but their solutions had more in common than is generally acknowledged and those solutions also required exceptional market conditions for their successful implementation Breaking from Taylorism Ulrich Jürgens,Thomas Malsch,Knuth Dohse,1993 Examines the restructuring of work practices in the world automobile industry in the 1980s
