indigeneity gender class ethnicity rurality and age interweave with bisexuality Indeed as much research has shown erasure exclusion and the absence of intersectionality have been considered major factors in bisexual young people family members and educators in school communities experiencing worse mental emotional sexual and social health than their homosexual or heterosexual counterparts This book is the first of its kind providing an international collection of empirical research theory and critical analysis of existing educational resources relating to bisexuality in education Each chapter addresses three significant issues in relation to bisexuality and schooling erasure exclusion and the absence of intersectionality From indigenous to rural schools from tertiary campuses to elementary schools from films to picture books as curriculum resources from educational theory to the health and wellbeing of bisexual students this book s contributors share their experiences expertise and ongoing questions This book was originally published as a special issue of the Journal of Bisexuality
