Editors, 2025-05-02 The ancient world was full of many fantastic cities and places and like today s major cities the great ancient cities were hubs of trade religion and science Writing was first invented in ancient cities and many important scientific discoveries were also made in them some of which are still used in the modern world Among the many cities of the ancient world Rome and Athens may come to mind first but the city of Babylon in the land of Mesopotamia was already an ancient venerated city when the others were still inconsequential settlements Today Babylon has become a byword for greed excess and licentiousness mostly due to its mention in the Bible but a closer examination reveals that Babylon was so much more and even perhaps the most important city in the ancient world Ancient Babylon was home to great dynasties that produced some of the world s most influential leaders most notably Hammurabi and Nebuchadnezzar and these rulers invoked their wills on the entire ancient Near East and have been remembered as both progressive and cruel all at the same time Babylon was also the seat of culture in ancient Mesopotamia and the place where scholars made amazing scientific advances that would not be eclipsed for several centuries An examination of ancient Babylon demonstrates that it was truly the first great city in the ancient world Of course the sheer span of history between Babylon s power and today has produced plenty of historical questions and controversy One of the things people most closely associate Babylon with is the Hanging Gardens which like the Great Pyramid of Giza were considered both a technological marvel and an aesthetic masterpiece Ancient historians believed that the Hanging Gardens were constructed around the 7th century B C after the second rise of Babylon which would make them the second oldest of the Seven Wonders of the Ancient World and they were reputedly created by the biblical Nebuchadnezzar II the king who conquered Judea to please his homesick wife after the model of Egyptian pleasure gardens However in 1993 British Assyriologist Stephanie Dalley proposed a theory that the Hanging Gardens were ordered built by the Assyrian King Sennacherib a century earlier for his giant palace at Nineveh instead She believed that the two sites were easily confused by ancient sources resulting in the Gardens being incorrectly located in Babylon a century later Babylon was also instrumental in the development of the region s religions Ancient Mesopotamian religion continues to captivate people for many of the same reasons today s best known religions and their histories fascinate people The religion practiced by the Ancient Mesopotamians provides a certain mix between the mundane and the surreal and at the same time aspects of it are both familiar and bizarre to people today Some find themselves drawn to it based on its

preeminent position in religious history as the oldest documented religion in the world Others become fascinated with the close connections between some of the Mesopotamian religious texts which include a flood story a creation story and a story of the righteous sufferer and their parallels in the Hebrew Bible Today the Ancient Mesopotamians and their religion are a source of curiosity but thousands of years ago the religion was an integral part of their lives From their birth to their death deities surrounded them and whether their social interactions were on the level of a smaller city or that of a larger nation state deities played key roles in the social fabric of their society In fact the people and religion were so intertwined that a study of Ancient Mesopotamian religion is a study of Ancient Mesopotamian culture

The Mystery of the Hanging Garden of Babylon Stephanie Dalley, 2013-05-23 The Mystery of the Hanging Garden of Babylon is an exciting story of detection involving legends expert decipherment of ancient texts and a vivid description of a little known civilization Recognised in ancient times as one of the Seven Wonders of the World the legendary Hanging Garden of Babylon and its location still remains a mystery steeped in shadow and puzzling myths In this remarkable volume Stephanie Dalley a world expert on ancient Babylonian language gathers for the first time all the material on this enigmatic World Wonder Tracing the history of the Garden Dalley describes how the decipherment of an original text and its link to sculpture in the British Museum has enabled her to pin down where the Garden was positioned and to describe in detail what it may have looked like Through this dramatic and fascinating reconstruction of the Garden Dalley is also able to follow its influence on later garden design Like a palimpsest Dalley unscrambles the many legends that have built up around the Garden including the parts played by Semiramis and Nebuchadnezzar and following the evolution of its design she shows why this Garden deserves its place alongside the Pyramids and the Colossus of Rhodes as one of the most astonishing technical achievements of the ancient world
