Back To Nature The Arcadian Myth In Urban America:

Back to Nature Peter J. Schmitt, 1990-02 Peter J Schmitt describes the many ways in which America's urban middle class became involved with nature from the turn of the century to shortly after World War I and he assess the influence of the Arcadian myth on American culture With sympathy and gentle irony he surveys the manifestations of the American love affair with the country summer camps the beginnings of wildlife protection and the conservation crusade landscaped cemeteries Christian ornithology and wilderness novels The Arcadian drive reflected urban values as the city dweller sought virtue in nature Landscape gardening country clubs national parks and scenic turnoffs imposed the industrial ethic of order neatness and regularity on natural landscapes Nature study and anthropomorphic animal stories taught moral values to children

Back to Nature Peter J. Schmitt, 1969 The Incomplete Child Scot Danforth, 2009 With the passage of Public Law 94 142 in 1975 the learning disability construct gained national legitimacy Feeding that political achievement behind the very idea of a learning disability was the development of a science that blended neurology psychology and education This book tracks the historical creation of the science of learning disabilities beginning with the clinical research with brain injured World War I soldiers conducted by German physician Kurt Goldstein It traces the growth of the two primary research traditions the psycholinguistic theory of Samuel Kirk and the movement education of Newell Kephart exploring how specific scientific orientations theories and practices led to the birth of the learning disability in the United States The Science Education of American Girls Kim Tolley, 2014-04-08 The Science Education of American Girls provides a comparative analysis of the science education of adolescent boys and girls and analyzes the evolution of girls scientific interests from the antebellum era through the twentieth century Kim Tolley expands the understanding of the structural and cultural obstacles that emerged to transform what in the early nineteenth century was regarded as a girl's subject As the form and content of pre college science education developed Tolley argues direct competition between the sexes increased Subsequently the cultural construction of science as a male subject limited access and opportunity for girls **The Country in the City** Richard A. Walker, 2009-11-23 Winner of the Western History Association's 2009 Hal K Rothman Award Finalist in the Western Writers of America Spur Award for the Western Nonfiction Contemporary category 2008 The San Francisco Bay Area is one of the world's most beautiful cities Despite a population of 7 million people it is more greensward than asphalt jungle more open space than hardscape A vast quilt of countryside is tucked into the folds of the metropolis stitched from fields farms and woodlands mines creeks and wetlands In *The Country in the City* Richard Walker tells the story of how the jigsaw geography of this greenbelt has been set into place The Bay Area's civic landscape has been fought over acre by acre an arduous process requiring popular mobilization political will and hard work Its most cherished environments Mount Tamalpais Napa Valley San Francisco Bay Point Reyes Mount Diablo the Pacific coast have engendered some of the fiercest environmental battles in the country and have made the region a leader in green ideas and organizations This book tells how

the Bay Area got its green grove from the stirrings of conservation in the time of John Muir to origins of the recreational parks and coastal preserves in the early twentieth century from the fight to stop bay fill and control suburban growth after the Second World War to securing conservation easements and stopping toxic pollution in our times Here modern environmentalism first became a mass political movement in the 1960s with the sudden blooming of the Sierra Club and Save the Bay and it remains a global center of environmentalism to this day Green values have been a pillar of Bay Area life and politics for more than a century It is an environmentalism grounded in local places and personal concerns close to the heart of the city Yet this vision of what a city should be has always been informed by liberal even utopian ideas of nature planning government and democracy In the end green is one of the primary colors in the flag of the Left Coast where green enthusiasms like open space are built into the fabric of urban life Written in a lively and accessible style *The Country in the City* will be of interest to general readers and environmental activists At the same time it speaks to fundamental debates in environmental history urban planning and geography

Two Weeks Every Summer Tobin Miller Shearer, 2017-04-11 *Two Weeks Every Summer* which is based on extensive oral history interviews with former guests hosts and administrators in Fresh Air programs opens a new chapter in the history of race in the United States by showing how the actions of hundreds of thousands of rural and suburban residents who hosted children from the city perpetuated racial inequity rather than overturned it Since 1877 and to this day Fresh Air programs from Maine to Montana have brought inner city children to rural and suburban homes for two week summer vacations Tobin Miller Shearer brings to the forefront of his history of the Fresh Air program the voices of the children themselves through letters that they wrote pictures that they took and their testimonials Shearer offers a careful social and cultural history of the Fresh Air programs giving readers a good sense of the summer experiences for both hosts and the visiting children By covering the racially transformative years between 1939 and 1979 Shearer shows how the rhetoric of innocence employed by Fresh Air boosters largely served the interests of religiously minded white hosts and did little to offer more than a vacation for African American and Latino urban youth In what could have been a new arena for the civil rights movement white adults often overpowered the courageous actions of children of color By giving white suburbanites and rural residents a safe race relations project that did not require adjustments to their investment portfolios real estate holdings or political affiliations the programs perpetuated an economic order that marginalized African Americans and Latinos by suggesting that solutions to poverty lay in one on one acts of charity

American Environmental History Carolyn Merchant, 2007 By studying the many ways diverse peoples have changed shaped and conserved the natural world over time environmental historians provide insight into humanity's unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis Beginning with the precolonial land use practice of Native Americans and concluding with our twenty first century concerns over our global ecological crisis *American Environmental History* addresses contentious issues such as the preservation of

the wilderness the expulsion of native peoples from national parks and population growth and considers the formative forces of gender race and class Entries address a range of topics from the impact of rice cultivation slavery and the growth of the automobile suburb to the effects of the Russian sea otter trade Columbia River salmon fisheries the environmental justice movement and globalization This illustrated reference is an essential companion for students interested in the ongoing transformation of the American landscape and the conflicts over its resources and conservation It makes rich use of the tools and resources climatic and geological data court records archaeological digs and the writings of naturalists that environmental historians rely on to conduct their research The volume also includes a compendium of significant people concepts events agencies and legislation and an extensive bibliography of critical films books and Web sites

Greening the City Dorothee Brantz, Sonja Dümpelmann, 2011-06-24 The modern city is not only pavement and concrete Parks gardens trees and other plants are an integral part of the urban environment Often the focal points of social movements and political interests green spaces represent far more than simply an effort to balance the man made with the natural A city's history with and approach to its parks and gardens reveals much about its workings and the forces acting upon it Our green spaces offer a unique and valuable window on the history of city life The essays in *Greening the City* span over a century of urban history moving from fin de siècle Sofia to green efforts in urban Seattle The authors present a wide array of cases that speak to global concerns through the local and specific with topics that include green space planning in Barcelona and Mexico City the distinction between public and private nature in Los Angeles the ecological diversity of West Berlin and the historical and cultural significance of hybrid spaces designed for sports The essays collected here will make us think differently about how we study cities as well as how we live in them Contributors Dorothee Brantz Technische Universität Berlin Peter Clark University of Helsinki Lawrence Culver Utah State University Konstanze Sylva Domhardt Swiss Federal Institute of Technology Zurich Sonja Dümpelmann University of Maryland Zachary J S Falck Independent Scholar Stefanie Hennecke Technical University Munich Sonia Hirt Virginia Polytechnic Institute and State University Salla Jokela University of Helsinki Jens Lachmund Maastricht University Gary McDonogh Bryn Mawr College Jarmo Saarikivi University of Helsinki Jeffrey Craig Sanders Washington State University
