contributed volume considers the emergence of coworking as centered in labor issues More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i e self employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor Grounded in this perspective this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed more cautionary views prevail highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies The aims of this collection are twofold First it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non human actors as agents of change associated with coworking and the re organization of work and labor power And second it

aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated A narrative that does not emphasize entrepreneurship or coworking as the epitome of the neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change So it is about alternative narratives emancipation politics and the wider social role that coworking spaces might play in neighborhoods cities or beyond because they are crucial contexts for the formation and maintenance of social relations With this specific direction this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work feminist perspectives on care alternative and diverse economies post capitalist transformation critical geography positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships European Narratives on Remote Working and Coworking During the COVID-19 Pandemic Mina Akhavan,Marco Hölzel,Divya Leducq,2023-05-02 This open access book offers a multidisciplinary and comprehensive perspective regarding the immediate and long term effects of the Covid 19 pandemic on coworking spaces in the European Region The current pandemic has imposed several effects on work and spaces for work Some are immediate effects and will last for a short time such as the closing down of the space some will last longer namely the reorganisation of the space to meet the physical distancing and some will stay for a long time remote working and hybrid working Although the literature on coworking spaces and the effects of the pandemic is growing fast empirical studies are yet limited Within this context this book seeks a twofold aim i to contribute to the fast growing literature on coworking space and their effects at different scales ii to present a multidisciplinary perspective about the effects of the yet lasting Corona pandemic effects on the patterns of remote working and consequently on coworking spaces as the most diffused form of new working spaces **Awakening the Management of Coworking Spaces** Ricarda B. Bouncken,2023-01-24 In Awakening the Management of Coworking Spaces the chapter authors combine a scientific approach with managing implications developing theoretic constructs reporting qualitative and quantitative findings about challenges potentials effects managerial solutions and success stories Handbook of Recycling Christina Meskers,Ernst Worrell,Markus A. Reuter,2023-10-17 Handbook of Recycling Second Edition Winner of the International Solid Waste Association s 2014 Publication Award is an authoritative review of the current state of recycling reuse and reclamation processes commonly implemented today and how they interact with one another Fully updated to cover recent developments in the field this second edition has also been restructured to cover General Aspects of Recycling Applications Technology Recovery and Collection Economics Governance and Policy Several new chapters on global recycled material flows sludges reinforced plastics and landfill mining have been added It concludes with a review of the policy and economic implications including the impact of recycling on energy use sustainable development and the environment This

book is a crucial aid to students and researchers in a range of disciplines from materials and environmental science to public policy studies Chapters authored by key experts from academia industry and the policymaking community Provides a thorough analysis from theory to practice to deeply understand the fundamentals dynamics complex interactions opportunities and challenges of recycling within the larger picture of a circular system Describes the state of the art and lessons learned to understand future challenges in recycling of a wide variety of products materials and waste flows Introduces the tools and practices to understand the opportunities and limitations of recycling in the context of a circular economy
