Committee on Veterans' Affairs, 1955 [Friends' Intelligencer](#), 1861 **Old-Fashioned Ethics and Common-Sense Metaphysics** William Thomas Thornton, 2022-05-28 In Old Fashioned Ethics and Common Sense Metaphysics William Thomas Thornton presents a thoughtful examination of moral philosophy through a distinctly 19th century lens The book articulates a systematic approach to ethics intertwining metaphysical concepts with practical moral reasoning Thornton employs a clear accessible prose style reflecting the traditions of Utilitarianism and Rationalism while critiquing contemporary moral debates making a case for a return to foundational ethical principles grounded in common sense His work engages with the pressing social issues of his time exploring how ethics can inform actions in an evolving society William Thomas Thornton a prominent English philosopher and economist champions the value of traditional morals amidst the rapid changes of the Industrial Revolution With a background steeped in the empirical philosophies of his predecessors Thornton's academic pursuits reflect a deep concern for societal welfare and individual responsibility His diverse experiences in economics and moral philosophy uniquely position him to address the intersections between ethical theory and everyday life offering insights that remain relevant today Readers seeking a profound understanding of ethics and metaphysics will find in Thornton's work a compelling and timely exploration This book is not just an academic treatise it invites readers to reflect on their own moral frameworks and encourages a thoughtful discourse on what constitutes true ethical living **The Works of President Edwards: Practical sermons** Jonathan Edwards, 1830 **Acquiring Culture (Psychology Revivals)** Gustav Jahoda, Ioan Lewis, 2015-03-27 Until the 70s and 80s anthropologists studying different cultures had mainly confined themselves to the behaviour and idea systems of adults Psychologists on the other hand working mainly in Europe and America had studied child development in their own settings and simply assumed the universality of their findings Thus both disciplines had largely ignored a crucial problem area the way in which children from birth onwards learn to become competent members of their culture This process which has been called the quintessential human adaptation constitutes the theme of this volume originally published in 1988 It derives from a workshop held at the London School of Economics which brought together fieldworkers who in their studies had paid more than usual attention to children in their cultures Their experience and foci of interest were varied but this very diversity serves to illuminate different facets of the acquisition of culture by children ranging in age from pre verbal infants to adolescents Evolutionarily primed for culture learning children are responsive to a rich web of influences from subtle and indirect as in their music and dance to direct teaching in the family guided by culture specific ideas about child psychology Some of the salient things they

learn relate to gender status and power critical for the functioning of all societies The introductory essay provides the necessary historical background of the development of child study in both anthropology and psychology and outlined how future research in the ethnography of childhood should proceed The book concludes with an annotated bibliography providing a guide to the literature from 1970 onwards Law as a Leap of Faith John Gardner,2012-09-06 In a series of essays John Gardner has developed distinctive and engaging answers to the central questions of legal philosophy cutting through the technicalities of the subject to clarify and reinvigorate the main arguments about the nature of law This volume collects that work to provide a major contribution to the literature on jurisprudence The Works of Mr. de Voltaire.
