About Space:

Know All About Space Tripti Nainwal,2008-01-01 Did you know that stars do not twinkle And the shiniest star in the sky is not a star at all Did you know that if you went to planet Jupiter you would have nothing to stand on it does not have any land Read about these and discover many more fascinating facts about outer space **The Truth About Space** H.L.A. Fraser,2024-10-02 In our solar system there is one planet Earth and on that planet there is one species of human life Globally we are all members of that species and there are no exceptions Beyond our solar system there is one universe and only one universe And if there is only one universe then there can be only one truth regarding the origins of that universe As a species of intelligent life living on this planet and in this universe we have a duty of responsibility to determine what that truth is in a way that we can prove it to ourselves as a fact of knowledge that can be proven to be true beyond any shadow of a doubt If we exist as a living form of conscious intelligence then that is the goal we should be aiming for because finding the truth about the origins of the universe leads to the truth about the reason why we are a living part of it The mathematical proofs that are published in this book which are remarkably simple to understand can be used as a foundation of knowledge that will help us to achieve that goal The reason for this is because these proofs are self evident independent and utterly irrefutable And they can be understood universally because mathematics is the language of the universe These are the mathematics that explain the origin of space **The Great Beyond Book for Kids: Fascinating Facts About the Universe** Thomas R.
