**Eco-Innovation and Green Productivity for Sustainable Production and Consumption, 2nd edition** Munir Ahmad, Cem Işık, Zeeshan Fareed, 2025-09-12 With the graduation of time the desire for enhanced production and consumption scales motivated the global economies to opt for the race to the bottom approach leading to environmental unsustainability On the one hand economies focused on escalated production levels proliferating non renewable energy consumption and reducing energy productivity leading to production based carbon dioxide CO2 emissions On the other hand

international trade of high CO<sub>2</sub> emissions embedded goods has skyrocketed the consumption based CO<sub>2</sub> emissions. Since production and consumption based CO<sub>2</sub> emissions challenge environmental sustainability, there is an urgent need to pursue sustainable production and consumption to realize the United Nations Sustainable Development Goals (SDGs) dream. In this regard, eco innovation came into play to transition the conventional production setup to a cleaner production mode. Eco innovation involves all types of technological advancements extending contributions to the SDGs. In this regard, climate technologies and environmental technologies involving renewable energy (e.g. wind, solar, biogas), energy efficient technologies (e.g. energy efficient electric appliances), environmental pollution reduction technologies (e.g. carbon scrubbing filters, water purifiers), waste mitigation technologies play a tremendous role in mitigating climatic adversities and environmental unsustainabilities. By contributing to the responsible use of natural capital, eco innovation facilitates efficient energy utilization, improving energy productivity as well as environmental sustainability. Moreover, eco innovation has the inherent potential to aggravate sustainable production modes through green productivity, a tool to enhance industrial outputs with fewer harms to the environment. As a progressive move, green productivity growth promotes a new trend of producing more economic output by consuming fewer resources and safeguarding ecosystems. The mainstream empirical literature substantiated that eco innovation and green productivity remained critical players in limiting CO<sub>2</sub> emissions and promoting environmental sustainability. Literature also witnessed that eco innovation ameliorated energy productivity by motivating the countries to adopt cost saving and environmentally friendly technologies. On the contrary, the rebound effect supported the environmental deterioration impact of such technologies. Against this backdrop, this Research Topic will provide an opportunity to further delve into the influencing mechanisms triggered by eco innovation and green productivity growth on energy productivity and environmental sustainability for a futuristic perspective of sustainable production and consumption. This Research Topic welcomes theoretical and empirical original research articles and reviews. Research themes and areas include but are not limited to the following: Links between eco innovation, green productivity growth and energy productivity for sustainable production; Climate technologies and carbon neutrality applications for sustainable production; Firm level environment related innovation practices; Renewable and energy efficient industrial transition for sustainable production; Eco innovation through the firm life cycle for sustainable production and consumption; Green innovation driven business models for sustainable production; Climate technology driven policies for sustainable production and consumption; Eco innovation and zero emissions agenda implementation.

**Environment-Friendly Products—Adapt Green Now** Dr. Aparna P.

Goyal, 2017-12-14 Excessive pollution has provoked the nature and the nature starts behaving in unnatural ways in form of global warming versus global cooling, heavy rains versus draught and other natural calamities like frequent earthquakes and tsunami, cyclones, epidemics and so forth. Economic growth via production and consumption threatens peaceful life of human beings on the earth. Environment friendly eco green marketing is an attempt to protect consumer welfare and environment.

the nature through production consumption and disposal of eco friendly products Basically green marketing is concerned with three aspects 1 promotion of production and consummation of pure quality products 2 fair and just dealing with customers and society and 3 protection of ecological environment Thus green marketing is a marketing philosophy that promotes production and selling of pure eco friendly products with protection of ecological balance Green marketing involves multiple activities Green marketing encourages production of pure products by pure technology conservation of energy preservation of environment minimum use of natural resources and more use of natural foods instead of processed foods Efforts of people social organizations firms and governments in this regard can be said as green marketing efforts Green marketing raises the voice against production consumption and or disposal of such products that harm consumers the society and the environment anyway It is necessary that businessmen and users should refrain from harmful products

**Sustainable Practices in the Fashion and Retail Industry** Tarnanidis, Theodore, Papachristou, Evridiki, Karypidis, Michail, Manda, Vijaya Kittu, 2025-03-07 Sustainable shopping practices are becoming more prevalent in the fashion and retail industry as consumers demand more ethical and environmentally friendly products The industry's negative environmental and social impacts are being reduced through these efforts which often create high levels of waste pollution and exploitation Technological advancements shifting values and changing economic and environmental conditions are shaping the future of consumer shopping habits As the impact of consumers on society and the environment grows and digital innovations alter the way people interact with brands the retail landscape is expected to change significantly Further exploration of these sustainable practices may provide improved solutions for environmentally conscious fashion and retail businesses Sustainable Practices in the Fashion and Retail Industry explores the continuing trends of sustainable techniques and practices in the fashion and retail business It examines how consumer habits are evolving toward more thoughtful personalized and technology driven experiences that align with modern values and lifestyles This book covers topics such as green marketing social media and circular economy and is a useful resource for business owners policymakers entrepreneurs economists academicians and researchers

**Essentials of Positive Psychology** Dr. R. Sengamalam, Positive psychology is a branch of psychology that focuses on the positive aspects of human experience and behaviour aiming to enhance well being and promote flourishing Traditional psychology has often focused on treating mental illness and dysfunction whereas Positive psychology emerged to provide a more holistic understanding of human nature by studying positive emotions strengths and virtues As societies progress there is an increasing recognition that measuring progress solely through economic indicators is insufficient Positive psychology addresses the need to enhance overall life satisfaction and happiness Positive psychology aims to improve the quality of life by focusing on aspects such as happiness life satisfaction and the overall well being of individuals and communities By emphasizing positive emotions relationships and individual strengths positive psychology can contribute to preventing mental health issues and promoting resilience Positive psychology is not

only about treating issues but also about optimizing human performance It explores how individuals and organizations can thrive and achieve their full potential Positive psychology is essential in the present scenario as it provides a comprehensive framework for understanding and enhancing the positive aspects of human life Its application extends to various domains contributing to individual well being organizational success and societal progress In order to realize the importance of this branch of psychology I made myself to contribute this small work by combining others thoughts and views through their conceptual understanding and a few studies in this area to some extent
