African Renaissance July/August 2005 Jideofor Adibe, 2005-08-01 African Renaissance is a leading multidisciplinary journal for the analysis of Africa's development aspirations and challenges. A bi-monthly, the journal is a cross between an academic publication and any higher end news report. It targets policymakers, academics and policy moulders and is very popular with leading Africanists.

African Renaissance, 2006

China's Integration Into the World Economy John Whalley, 2011 This book discusses China's integration into the world economy drawing on papers previously written by the editor. It focuses on strong trade growth, FDI inflows, innovation policy including transfer of technology and intellectual property, the role of saving and the accumulation of human capital. It also analyzes the quantitative significance of openness in driving China's growth. While other books on China do not focus much on China's integration into the world economy, this book provides technically strong analyses of key contributing factors to China's growth performance. It also highlights innovation and education policy and their significance for the 11th five year plan which aims to quadruple real income per capita between 2000 and 2020.

Africa in China's Global Strategy Marcel Kitissou, 2007-08-31 China in the past five years has developed a proactive global policy and is emerging as a new global power with particular focus on developing countries in Central Asia, Southeast Asia, Latin America and Africa. What is the role of Africa in China's emerging global foreign policy? In 1998, China's aid to Africa was 107 million. By 2004, it had reached 2.7 billion, 26% of its international assistance that year. In 2005, Africa-China trade reached 40 billion, 35% up from the previous year. China is interested mainly in four sectors: infrastructure projects, regional banks such as the African Development Bank, training of African professionals, particularly in economic management and institutions of higher education with the goal of establishing Chinese language programs. The human factor is also important. Chinese Diaspora is fast increasing. For example, in Zambia it grew from 3,000 to 30,000 in ten years and in South Africa from practically none to 300,000. African countries constitute a new market for Chinese products. They also provide a source of raw materials. Today the continent supplies 30% of China's import of oil and gas, Angola being the largest supplier with 522,000 barrels of oil per day to China. The last five years, Chinese oil companies spent 15 billion acquiring oil fields and local companies. The appetite for raw materials goes beyond oil and gas and China's foreign political strategy is primarily to solve its own domestic problems and protect its interests in the global arena. Will Africa be a pawn or a player in this emerging geopolitical game? Will China's deepening relations with the continent represent a new opportunity for African countries to negotiate a new partnership and skillfully use it to the best advantage of their citizens? These are some of the questions contributors to the volume have tried to answer by examining various facets of these deepening relations and underlining areas of concerns as well as the opportunities for mutually rewarding relations.

Chinese Foreign Relations Robert G. Sutter, 2008 This comprehensive introduction to Chinese foreign relations explores the opportunities and limits China faces as it seeks growing international influence. Tracing the record of twists and turns in

Chinese foreign relations since the end of the Cold War Robert G Sutter provides a nuanced analysis that shows that despite popular perceptions of its growing power Beijing is hampered by both domestic and international constraints This text s balanced and thorough assessment shows China s leaders exerting more influence in world affairs but remaining far from dominant Facing numerous contradictions and tradeoffs they move cautiously as they deal with a complex global environment

Rise Of The Global South, The: Philosophical, Geopolitical And Economic Trends Of The 21st Century Justin Dargin,2013-05-27 This book provides a broad and in depth introduction to the geopolitical economic and trade changes wrought with the increasing influence of the countries of the Global South in international affairs The global role of the developing countries came to the forefront in 1974 when the United Nations General Assembly promulgated The New International Economic Order Since then the countries of the Global South particularly China India Brazil Saudi Arabia South Africa and Qatar made an indelible impact upon the world s economic architecture However their true influence became starkly illustrated during the onset of the 2000s when several seismic events occurred The September Eleventh terrorist attacks with the resultant debilitating wars in Iraq and Afghanistan extreme world commodity price increases and the global financial crisis of 2007 2008 all served to wrench the epicenter of global influence increasingly southward While the developed countries of the Global North became mired in economic stagnation with problems associated with the global financial crisis their collective influence waned Since then the world has been attempting to accommodate somewhat unevenly the rising geopolitical and economic clout of the Global South This book presents a collection of scholarly articles that taken together functions as a primer on the workings of the immense global changes at the beginning of the twenty first century

China Safari Serge Michel,Michel Beuret,2010-08-24 Describes the growing economic relationship between China and developing African nations claiming that the nation s lack of colonial past and political preconditions provides China a unique opportunity to help Africa direct its own fate *China's Soft Power and International Relations* Hongyi Lai,Yiyi Lu,2012-05-23 China s soft power has attracted considerable attention in the recent decade In this volume scholars from the U K Europe the U S Singapore Australia Hong Kong and mainland China including a number of well established and well known analysts on China examine main areas where China has made noticeable advances in its appeal and influence They include China s foreign policy discourse international communication cultural diplomacy and foreign assistance In addition Chinese concept of soft power foreign policy strategy and the relationship between its international standing and that of the U S are also closely analysed The volume covers some of the most recent development and assesses China s soft power critically This book offers an assessment of China s efforts to cultivate its international image as well as a critique of Nye s theory of soft power It draws on case studies of the Chinese diplomatic practice and utilizes world opinion polls This volume offers a theoretical and empirical perspective on the discussion on soft power with a particular focus on China s soft power

The Rise of the Global South Justin Dargin,2013 This book provides a broad and in depth introduction to the

geopolitical economic and trade changes wrought with the increasing influence of the countries of the Global South in international affairs. Since the introduction of the United Nations General Assembly's New International Economic Order, the countries of the Global South, particularly China, India, Brazil, Saudi Arabia, South Africa, and Qatar, made an indelible impact upon the world's economic architecture. The Forum on China-Africa Cooperation (FOCAC) Ian Taylor, 2010-12-20. The increase in China's economic and political involvement in Africa is arguably the most momentous development on the continent since the end of the Cold War. This book seeks to detail the origins, structure, workings, and activities of The Forum on China-Africa Cooperation (FOCAC) and its development over the last nine years. Mindful of the growing realisation that Africa is to play an increasingly important role in global energy politics, Ian Taylor provides a clear and detailed overview of an organisation that has been generally overlooked despite the exponential rise in the importance of the Chinese presence in Africa. Topics addressed include the key structures, functions, and operations of the FOCAC; the importance and development of the triennial summits, including the focus on cultural exchanges and economic cooperation; the key criticisms and challenges currently faced by the FOCAC; discussion of emerging issues; is it possible to have a win-win situation between Africa and China, as the FOCAC suggests? The Forum on China-Africa Cooperation provides a concise introduction to an organisation that will be instrumental in the future of Africa's relationship with the developed world and will be of interest to students of African and Chinese politics, International Relations, and International Organizations.
