African American Women And Poverty Can Education Alone Change The Status Quo:

African-American Women and Poverty Catherine M. Casserly, 1998 African American Women and Poverty examines why educational investments by African American women the group in American society that is most susceptible to being poor have not reduced poverty as expected The analysis in this study reveals that the ability of human capital investment to alleviate poverty for African American women differs depending on whether one estimates private or social returns Tables Charts Appendices Bibliography Index

African-American Women and Poverty Catherine M. Casserly, 2021-10-28 In the United States public policies designed to reduce poverty are overwhelmingly influenced by human capital theory since education is viewed as the powerful mechanism by which productivity will increase incomes will be raised and economic opportunity will be provided Although African American women followed the prescription set forth by human capital theory and increased their educational attainment by over 2 years from the late 1960s to the late 1980s their incidence of poverty remained fairly stable First published in 1998 this study examines why educational investments by that population most susceptible to being poor African American females have not reduced poverty as expected

Hard Work Is Not Enough Katrinell M. Davis, 2016-11-14 The Great Recession punished American workers leaving many underemployed or trapped in jobs that did not provide the income or opportunities they needed Moreover the gap between the wealthy and the poor had widened in past decades as mobility remained stubbornly unchanged Against this deepening economic divide a dominant cultural narrative took root immobility especially for the working class is driven by shifts in demand for labor In this context and with right to work policies proliferating nationwide workers are encouraged to avoid government dependency by arming themselves with education and training Drawing on archival material and interviews with African American women transit workers in the San Francisco Bay Area Katrinell Davis grapples with our understanding of mobility as it intersects with race and gender in the postindustrial and post civil rights United States Considering the consequences of declining working conditions within the public transit workplace of Alameda County Davis illustrates how worker experience on and off the job has been undermined by workplace norms and administrative practices designed to address flagging worker commitment and morale Providing a comprehensive account of how political social and economic factors work together to shape the culture of opportunity in a postindustrial workplace she shows how government manpower policies administrative policies and drastic shifts in unionization have influenced the prospects of low skilled workers

Minorities and Deviance Pamela Black, 2018-11-15 Grounded in both current and original research Minorities and Deviance expands the definition of stress and its relationship to deviance providing a better understanding the role stress can play in addiction obsession and self harm Focusing on ten types of relatively minor deviant behaviors Pamela Black explores the stress engendered by minority group membership and the associated feelings of powerlessness and how this can serve as a significant source of stress in and of itself but when combined with other stressors magnifies the possibility of deviance Using theoretical constructs

derived from Robert Agnew's 1992 General Strain Theory Black tests the effects of not only minority group membership and powerlessness as stressors but also examines group differences in the effect of more traditional forms of stress finances health and relationships **American Book Publishing Record Cumulative 1998** R R Bowker Publishing,1999-03
