Fitzpatrick, 2012 Abstract This study on African naming practices during slavery and its aftermath examines the centrality of names and naming in creating suppressing retaining and reclaiming African identity and memory Based on recent scholarly studies it is clear that several elements of African cultural practices have survived the oppressive onslaught of slavery and European domination However most historical inquiries that explore African culture in the Americas have

tended to focus largely on retentions that pertain to cultural forms such as religion dance dress music food and language leaving out perhaps equally important aspects of cultural retentions in the African Diaspora such as naming practices and their psychological significance In this study I investigate African names and naming practices on the African continent the United States and the Caribbean not merely as elements of cultural retention but also as forms of resistance and their importance to the construction of identity and memory for persons of African descent As such this study examines how European colonizers attacked and defiled African names and naming systems to suppress and erase African identity since names not only aid in the construction of identity but also concretize a people s collective memory by recording the circumstances of their experiences Thus to obliterate African collective memories and identities the colonizers assigned new names to the Africans or even left them nameless as a way of subjugating and committing them to perpetual servitude In response my research investigates how African descendants on the continent and throughout the Diaspora resisted this process of obliteration of their memories and how they deployed the practice of naming for survival in such a hostile environment Therefore this study not only focuses on the deliberate attempt made by European colonizers to obliterate African memory and instill a sense of shame within the African community but also the various ways Africans resisted and sought to maintain their identity through names and naming practices and the important role names played in their lives both on the African continent and throughout the Diaspora

CULTURE OF NAMES IN AFRICA Emma Umana Clasberry,2012-01-12 INTRODUCTION Personal name is a vital aspect of cultural identity As a child you may have loved or hated your name But you were rarely indifferent to it What s in a name Shakespeare asked That which we call a rose by any other name would smell as sweet he explained Perhaps in England or somewhere else in Europe but not in Africa Personal names in African have meanings can affect personality hinder or enhance life initiatives They serve to establish a connection between name and cultural background and thus provide some information about cultural affinity and more such as express one s spirituality philosophy of life political or socio economic status as defined by a given ethnic cleavage African names tell stories convert abstract ideas to stories and tell story of the story about different aspects of one s life They commemorate any unusual circumstance the family or community once experienced or world event that took place around the time of a child s birth Outside a given cultural environment names boost and nurture cultural pride and identity showcase a people s appreciation of their culture and their readiness to defend and live their culture with pride and dignity Naming practices that tell histories behind the names were the norms in Nigeria Ibibio and in fact in Africa until the encroachment of

two historical forces in Africans affairs Christianization and colonization more than any other forces in history shattered the connection between personal name and cultural affinity and have ever since contributed to the gradual erosion of African culture of names On the continent the combined efforts of their human agents the missionaries and British colonial personnel directly and indirectly through their policies and practices caused African Nigerians to give up their culture relevant names in favor of foreign ones Apart from direct erosion of culture of names colonial administration a term I use mostly to refer to the combined efforts of the missionaries and British colonial personnel in Nigeria abrogated many religious socio economic and political traditions which were intimately intertwined with the people s naming practices Their attempt to replace African traditions with European ones through coercing Africans to accept Western values and beliefs consequently disabled many desirable African traditional structures including authentic African naming practices and caused some to fall into disuse A third force was early European African trade Although the impact of the presence of European merchants in Nigeria was minimal in this regard some of their activities have also left a dent on African naming practices by introducing foreign bodies into the people s names database Even though these alien forces invaded and injected foreign values into Africa over a century ago their impact on naming practices continues to be felt by Africans European intrusion in relation to African naming practices did not end on the continent The Trans Atlantic Trade on human cargo was another major historical event that did not only forcefully disconnect many Africans from their cultural root and natural habitat but also mutilated authentic African naming practices among them Consequently Africans in Diaspora had European names imposed upon them by their slave masters Today many Africans on the continent and in Diaspora continue to carry names which are foreign names whose meanings they do not know names the bearers can not even pronounce correctly in some ethnic contexts and names which have no relevance to nor any form of link with the bearers cultural background In effect culture of names as many other African customary practices has lost its savor Some peoples of African descent still cherish these colonized names Some do not and are making practical efforts to reclaim authentic African cul
