## **Against Civilization Readings And Reflections:**

**Against Civilization** John Zerzan, 1999-01-01      **The Self-destruction of the West** Damien François, 2007

Voilà plus de 10 000 ans que la civilisation occidentale s'est installée et voilà 10 000 ans qu'elle viole le sens même de la nature la vie. En s'appropriant sans concession ce qui l'entourait, l'homme de l'Ouest a vu son horizon ployer sous la charge de la destruction qu'il lui avait lui-même réalisée. Sommes-nous des lycanthropes ou des vampires? Ces monstres si terrifiants qui sortent de notre imagination sont-ils en réalité la copie de notre comportement d'ivrogne? Prétendons-nous pomper sans remords les énergies qui nous entourent? Jusqu'où ira-t-on?

*Anarcho-primitivism*,      **Against Ecological Sovereignty** Mick Smith, 2011-09-29

Links the political critique of sovereign power with ecological concerns

**Green Issues and Debates** Howard S. Schiffman, 2011-05-03

Green Issues and Debates explores the multitude of threats to sustainable life on earth and the myriad of controversies surrounding potential solutions. The grayer shades of green are deeply examined including such heady questions as: Is ethanol production from corn a recipe for famine? Does offshore drilling pose more of a risk to the environment than the problem it solves? Is clean coal a viable option or is it simply polluting the energy dilemma? Are genetically modified foods helpful or harmful? Well-respected scholars present more than 150 articles presented in A to Z format focusing on issues brought to the forefront by the green movement with carefully balanced pro and con viewpoints. A valuable tool for students of all facets of ecology, the environment and sustainable development, the volume fully engages the reader inspiring further debate within the classroom. Vivid photographs, searchable hyperlinks, numerous cross references, an extensive resource guide and a clear accessible writing style make the Green Society volumes ideal for the classroom as well as for research.

*Green Technology* Dustin Mulvaney, 2011-06-28

Green Technology: An A to Z Guide explores the essential role of technology and its most recent developments toward a sustainable environment. Twofold in its definition, green technology includes the changing of existing technology toward energy conservation as well as the creation of new clean technology aimed at utilizing renewable resources. With a primary focus on waste management, the volume presents more than 150 articles in A to Z format featuring such disciplines as nanoscience, biochemistry, information technology and environmental engineering. Scholars and experts in their fields present a full range of topics from applications of green technology to The Green Grid global consortium to membrane technology and water purification systems to waste-to-energy technology. This work culminates in an outstanding reference available in both print and electronic formats for academic, university and public libraries. Vivid photographs, searchable hyperlinks, an extensive resource guide, numerous cross references and a clear accessible writing style make the Green Society volumes ideal for classroom use as well as for research.

Integral Ecology Sean Esbjorn-Hargens, Ph.D., Michael E. Zimmerman, Ph.D., 2011-03-08

Today there is a bewildering diversity of views on ecology and the natural environment. With more than two hundred distinct and valuable perspectives on the natural world and with scientists, economists, ethicists, activists, philosophers and others often taking

completely different stances on the issues how can we come to agreement to solve our toughest environmental problems In response to this pressing need Integral Ecology unites valuable insights from multiple perspectives into a comprehensive theoretical framework one that can be put to use right now The framework is based on Integral Theory as well as Ken Wilber's AQAL model and is the result of over a decade of research exploring the myriad perspectives on ecology available to us today and their respective methodologies Dozens of real life applications and examples of this framework currently in use are examined including three in depth case studies work with marine fisheries in Hawai i strategies of eco activists to protect Canada's Great Bear Rainforest and a study of community development in El Salvador In addition eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness Integral Ecology provides the most sophisticated application and extension of Integral Theory available today and as such it serves as a template for any truly integral effort

**Integral Ecology** Sean Esbjörn-Hargens, Michael E. Zimmerman, 2009 Dozens of real life applications and examples of this framework currently in use are examined including three in depth cases studies work with marine fisheries in Hawai i strategies of eco activists to protect Canada's Great Bear Rainforest and a study of community development in El Salvador In addition eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness Jacket

Why Still Education? Gazela Pudar Draško, Predrag Krstić, Tamara Petrović-Trifunović, 2016-08-17 Why Still Education will appeal to researchers of education scholars and students alike in the fields of philosophy sociology pedagogy andragogy psychology political theory anthropology and history as well as experts in education management and educational practitioners such as teachers and textbook authors The question posed by the title is separated in the book into three more specific questions the first of which titled Education for What investigates the eternal issue the purpose of education The second section which examines the most appropriate approaches and expected outcomes for a child centred perspective is called Education for Whom and the third part Whose Education takes national gender and other subtle or self explanatory characteristics of education and looks at them from the standpoint of discrimination The volume offers nine different chapters which provide illuminating and interesting answers to these questions and thus allow them to be more thoroughly resolved and enable rational discourse about them

*A World Not Made for Us* Keith R. Peterson, 2020-09-01 In *A World Not Made for Us* Keith R Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorial ontology that affirms the basic principle of human asymmetrical dependence on more than human nature Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and

that coming to terms with this fact is a condition for survival in future human and more than human communities of liberation and solidarity
