Against Biological Determinism Steven Peter Russell Rose, *Dialectics of Biology* Group, 1982-01 Against Biological Determinism Steven Rose, 1982-06-01 **Against Biological Determinism**, 1982 The Sexual Self Michael S. Kimmel, 2007 Abstract **The Routledge Handbook of Dehumanization** Maria Kronfeldner, 2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity Yet the very nature of dehumanization remains relatively poorly understood The Routledge Handbook of Dehumanization is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies Organized into four parts the Handbook covers the following topics The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing How to tackle its complex facets with respect to the perpetrator s and the target s perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and anthropology this Handbook will also be of interest to those in related disciplines such as politics international relations criminology legal studies literary studies gender studies disability studies or race and ethnic studies as well as readers from social work political activism and public policy *Epidemic of Cardiovascular Disease and Diabetes* Raj S. Bhopal, 2019-02-07 In people with South Asian ancestry the cardiovascular diseases of stroke and coronary heart disease CVD are epidemic and type 2 diabetes mellitus DM2 is pandemic As South Asians comprise about 25% of the world s population their high susceptibility is of global public health and clinical importance Eluding researchers across the globe this phenomenon continues to be a subject of intensive enquiry As Ban Ki moon the United Nations Secretary General points out the epidemics of chronic diseases which he describes as a public health emergency in slow motion can be restrained but not stopped With a focus on the global South Asian population *Epidemic of Cardiovascular Disease and Diabetes Explaining the Phenomenon in South Asians* Worldwide is a critical review of current literature investigating the increase in cases of CVD and DM2 and the data underpinning them The book argues that the high risk of CVD and DM2 in urbanised South Asians is not inevitable genetic or programmed in a fixed way Rather exposure to risk factors in childhood adolescence and most particularly in adulthood is the key to unravelling its cause Drawing on current scientific literature and discussions with

22 international scholars the book presents a unique synthesis of theory research and public health practice under one cover from tissue research to human intervention trials It also addresses the challenge many health professionals face in developing countries to produce focused low cost and effective actions for combating CVD and DM2 The lessons contained within will have ramifications in healthcare across the globe Epidemic of Cardiovascular Disease and Diabetes Explaining the Phenomenon in South Asians Worldwide is ideal for scholars researchers and health practitioners working towards understanding and preventing the epidemics of these modern chronic diseases across the world **Fascism and Ideology** Salvatore Garau, 2015-03-24 This book develops a number of new conceptual tools to tackle some of the most hotly debated issues concerning the nature of fascism using three profoundly different national contexts in the inter war years as case studies Italy Britain and Norway It explores how fascist ideology was the result of a sustained struggle between competing internal factions which created a precarious but also highly dynamic balance between revolutionary totalitarian and conservative authoritarian tendencies Such a balance meant that these movements were hybrids with a surprising degree of internal diversity which cannot be explained away as simple opportunism or lack of ideological substance The book's focus on fascist ideology's internal variety and aggregative potential leads it to argue that when fascism succeeded this was less an effect of its revolutionary ideas than of the opposite namely its power to integrate elements from other pre-existing ideologies Given the prevailing opinion that fascism is revolutionary by definition the book ultimately poses a challenge to the dominant view in the field of fascist studies *Evolution, Gender, and Rape* Cheryl Brown Travis, 2003 Explains the flaws and limitations of a strictly biological model of rape and argues that traditionally stereotyped gender roles are grounded more in culture than in differing biological reproductive roles back cover *Dancing Identity* Sondra Horton Fraleigh, 2004-10-31 Combining critical analysis with personal history and poetry Dancing Identity presents a series of interconnected essays composed over a period of fifteen years Taken as a whole these meditative reflections on memory and on the ways we perceive and construct our lives represent Sondra Fraleigh's journey toward self definition as informed by art ritual feminism phenomenology poetry autobiography and always dance Fraleigh's brilliantly inventive fusions of philosophy and movement clarify often complex philosophical issues and apply them to dance history and aesthetics She illustrates her discussions with photographs dance descriptions and stories from her own past in order to bridge dance with everyday movement Seeking to recombine the fractured and bifurcated conceptions of the body and of the senses that dominate much Western discourse she reveals how metaphysical concepts are embodied and presented in dance both on stage and in therapeutic settings Examining the role of movement in personal and political experiences Fraleigh reflects on her major influences including Moshe Feldenkrais Kazuo Ohno and Twyla Tharp She draws on such varied sources as philosophers Simone de Beauvoir and Martin Heidegger the German expressionist dancer Mary Wigman Japanese Butoh founder Tatsumi Hijikata Hitler the Bomb Miss America Balanchine and the goddess figure of ancient cultures Dancing Identity offers new insights into modern life and

its reconfigurations in postmodern dance Feminism and Sexuality Stevi Jackson, Sue Scott, 1996 A comprehensive overview of feminist debates surrounding sexuality identifying the main theoretical positions and trends Contributors include Judith Butler bell hooks Luce Irigaray Catherine MacKinnon Adrienne Rich Gayle Rubin Judith Walkowitz and Monique Wittig
