Battleships of World War I Antony Preston,1972

Super-Battleships of World War I Angus Konstam,2025-05-22

As World War I ended the victors were developing a powerful new generation of hyper dreadnoughts and battlecruisers Fully illustrated this studies the big gun warships that never were 1918 was a moment of great naval change Britain still had the largest fleet in the world but its ships were ageing and many of them were markedly inferior to the latest American and Japanese battleships An arms race loomed between the war s victors In this book naval expert Angus Konstam studies and compares the battleships being designed between 1918 and 1922 which drew on the lessons of World War I Britain was designing four G3 class 15in gun battlecruisers plus four N3 hyper dreadnoughts mounting colossal 18in guns The US Navy was planning six new South Dakota battleships carrying an incredible 12 16in guns plus six Lexington class battlecruisers Japan was working on a similar project and in 1920 the first of four Amagi class battlecruisers were laid down However in 1922 this costly arms race was averted by the Washington Naval Treaty which halted new battleship construction and limited the major fleets These battleships and battlecruisers were mostly cancelled and scrapped with a few such as Lexington and Akagi converted into aircraft carriers With new colour reconstructions of the G3 H3 South Dakota Lexington and Amagi

Battleships William H. Garzke,Robert O. Dulin,1985 One of three volumes that trace the design construction and operation of post 1930 battleships and battlecruisers

Battleships of the World John Fidler,2016-09-30

The battleships of the worlds navies in the 1820s were descended directly in line from the Revenge of 1577 they were wooden built sail powered and mounted guns on the broadside firing solid shot In the next half century steel steam and shells

had wrought a transformation and by 1906 Dreadnought had ushered in a revolution in naval architecture. The naval race between Britain and Germany that followed led to the clash of the navies at Jutland in 1916. Though this was indecisive, the German navy never again challenged the Grand Fleet of Britain during the war and eventually the crews refused to put to sea again. Disarmament on a massive scale followed but the battleship was still regarded as the arbiter of sea power in the years between the wars. However, the advocates of air power were looking to the future and when in 1940 biplane Swordfish torpedo bombers of the Fleet Air Arm sank three Italian battleships at their moorings in Taranto, the Japanese sensed their opportunity. Their attack on the American Pacific fleet base at Pearl Harbor sank eight battleships but the American carriers were at sea and escaped destruction. Given the distances involved, the Pacific war was necessarily a carrier war and in the major actions of the Coral Sea, Midway, Leyte Gulf, and the Philippine Sea, all the fighting was done by aircraft, with battleships reduced to a supporting role. Soon after the war ended, most were sent for scrap and a naval tradition had come to an end.

Battleships Stanley L. Sandler, 2004-12-01. From ancient times to World War II and the postwar period, *Battleships* charts the evolution of the vessel that ruled the seas, a vessel that until the arrival of the aircraft carrier would be the most expensive and complex human-made moving object in history. *Battleships* charts the dramatic evolution of this dominating war vessel. Coverage ranges from ancient galleys to the great ships of World War II to the present, with special emphasis on the ironclad era of the mid-19th century, which saw the greatest innovation over the shortest timespan in naval history, and the great 20th-century battleship race of the dreadnought era. Written by expert military historian Stanley Sandler, *Battleships* provides insightful examinations of the technological and tactical aspects of important warships from around the world and across time. It also looks at the political and social factors driving the decision to produce battleships in different countries. No other volume has ever captured so completely the impact of the battleship as a weapon of war and a symbol of power.

British Battleships of World War Two Alan Raven, John Roberts, 1976. This lavishly illustrated volume, first published in 1976 and back by popular demand, presents the full story of the design and construction of every British battleship and battlecruiser class that served in World War II, from the Queen Elizabeth class to the Vanguard. Noted authors Alan Raven and John Roberts include a comprehensive review of each ship's initial configuration and refits, as well as developments in weapons, gunnery, fire control, radar, protection, and propulsion. There are also sections devoted to combat actions involving British battleships and comparisons with battleships of other navies. Six hundred photographs and illustrations, including sixteen fold-out pages, complement the authoritative history of the vessels. For other books in the battleship series, see page 26.
