Age Of Chopin Interdisciplinary Inquiries:

The Age of Chopin Halina Goldberg, 2004-05-07 This multidisciplinary collection addresses Chopin's life and oeuvre in various cultural contexts of his era. Fourteen original essays by internationally known scholars suggest new connections between his compositions and the intellectual, literary, artistic, and musical environs of Warsaw and Paris. Individual essays consider representations of Chopin in the visual arts, reception in the United States and in Poland, analytical aspects of the mazurkas and waltzes, and political, literary, and gender aspects of Chopin's music and legacy. Several senior scholars represent the fields of American, Western European, and Polish history, Slavic literature, musicology, music theory, and art history.

Chopin and His World Jonathan D. Bellman, Halina Goldberg, 2017-08-15 A new look at the life, times, and music of Polish composer and piano virtuoso Fryderyk Chopin. Fryderyk Chopin (1810-49), although the most beloved of piano composers, remains a contradictory figure: an artist of virtually universal appeal who preferred the company of only a few sympathetic friends and listeners. *Chopin and His World* reexamines Chopin and his music in light of the cultural narratives formed during his lifetime. These include the romanticism of the ailing spirit tragically singing its death song as life ebbs; the Polish expatriate, helpless witness to the martyrdom of his beloved homeland, exiled among friendly but uncomprehending strangers; the sorcerer, bard of dream, memory, and Gothic terror; and the pianist, shunning the appreciative crowds yet composing and improvising idealized operatic scenes, dances, and narratives in the shadow of virtuoso idol Franz Liszt. The international Chopin scholars gathered here demonstrate the ways in which Chopin responded to and was understood to exemplify these narratives as an artist of his own time and one who transcended it. This collection also offers recently rediscovered artistic representations of his hands, with analysis and for the first time in English, an extended tribute to Chopin published in Poland upon his death and contemporary Polish writings contextualizing Chopin's compositional strategies. The contributors are Jonathan D. Bellman, Leon Botstein, Jean Jacques Eigeldinger, Halina Goldberg, Jeffrey Kallberg, David Kasunic, Anatole Leikin, Eric McKee, James Parakilas, John Rink, and Sandra P. Rosenblum. Contemporary documents by Karol Kurpiński, Adam Mickiewicz, and Józef Sikorski are included.

Music in Chopin's Warsaw Halina Goldberg, 2008-03-04 Warsaw was aware of and in tune with the most recent European styles and fashions in music, but it was also the cradle of a vernacular musical language that was initiated by the generation of Polish composers before Chopin and which found its full realization in his work. Had Chopin been born a decade earlier or a decade later, Goldberg argues, the capital, devastated by warfare and stripped of all cultural institutions, could not have provided support for his talent. The young composer would have been compelled to seek musical education abroad and thus would have been deprived of the specifically Polish experience so central to his musical style.

Musical Biography Jolanta T. Pekacz, 2017-07-05 Musical biography has rarely been an object of theoretical and methodological reflection Our present day perception of the lives of prominent composers and performers of the past has been largely formed by cultural and political assumptions of nineteenth century biographers and their twentieth century followers While older biographies are being scrutinized for veracity and updated with new evidence their historiographical premisses and narrative techniques remain largely unchallenged The epistemological upheavals in the humanities since the 1960s have generated a body of theoretical thought that has undermined many of the assumptions of traditional biography Consequently many of these assumptions have lost their hold as viable underpinnings for present day scholarly biography For example the accumulation of facts is no longer believed to bring us closer to an understanding of the subject nor are the traditional views of the unified self and the self as a foundational idea taken for granted This volume brings together musicologists and historians who explore through individual case studies the rich potential of these new theories for writing musical lives The authors of this volume examine how the insights provided by these theories illuminate our critical reassessment of older biographies and the interpretations of musical works these biographies were used to construe and help forge new approaches to musical biography The authors also explore the functions musical biographies served in different historical contexts the relevance of biography for musical criticism the reliability of archival evidence the ethics of biography the demands placed on biography by feminist and gender history and the new possibilities offered by cinema The contributors to this volume challenge the view that biography has little importance for music history analysis and criticism Collectively they reassert biography s centrality and relevance and dem
