Biological Anthropology And Prehistory Exploring Our Human Ancestry:

Biological Anthropology and Prehistory Patricia C. Rice, Norah Moloney, 2016-12-05 Written specifically for courses that cover biological anthropology and archaeology this superbly illustrated new text offers the most balanced and up to date introduction to our human past Devoting equal time to biological anthropology and prehistory this text exposes students to the many sides of major controversial issues involving students in the scientific thought process by allowing them to draw their own conclusions Amidst discussions of bones and artifacts the text maintains a focus on people demonstrating to students how biological anthropology and archaeology apply to their lives today Featuring the latest research and findings pulled from the original sources this new text is far and away the most up to date text available In addition the superior art program features hundreds of photographs and figures and the multimedia presentation options include documentary film clips and lecture launcher videos Pat Rice a recipient of AAA s Outstanding Teacher Award and past president of the General Anthropology Division of AAA and Norah Moloney an experienced professor and active archaeologist present the material in a clear refreshing and straightforward writing style Homo Novus - A Human Without Illusions Ulrich J. Frey, Charlotte Störmer, Kai P. Willführ, 2010-08-24 Converging evidence from disciplines including sociobiology evolutionary psychology and human biology forces us to adopt a new idea of what it means to be a human As cherished concepts such as free will na ve realism humans as creation s crowning glory fall and our moral roots in ape group dynamics become clearer we have to take leave of many concepts that have been central to defining our humanness What emerges is a new human the homo novus a human being without illusions Leading authors from many different fields explore these issues by addressing a range of illusions and providing evidence for the need despite considerable reluctance to relinquish some of our most cherished ideas about ourselves I Love Jesus & I Accept Evolution Denis O. Lamoureux, 2009-03-04 In this thought provoking book born again Christian Denis O Lamoureux argues that the God of the Bible created the universe and life through evolution an ordained sustained and design reflecting natural process In other words evolution is not the result of blind chance and our creation is not a mistake Lamoureux challenges the popular assumption that God disclosed scientific facts in the opening chapters of Scripture thousands of years before their discovery by modern science He contends that in the same way the Lord meets us wherever we happen to be in our lives the Holy Spirit came down to the level of the inspired biblical writers and used their ancient understanding of origins in order to reveal inerrant life changing Messages of Faith Lamoureux also shares his personal story and struggle in coming to terms with evolution and Christianity **On the Origin of Societies by Natural Selection** Jonathan H. Turner, Alexandra Maryanski, 2015-11-17 Kinship religion and economy were not natural to humans nor to species of apes that had to survive on the African savanna Society from its very beginnings involved an uneasy necessity that often stood in conflict with humans ape ancestry these tensions only grew along with later more complex eventually colossal sociocultural systems The ape in us was not extinguished nor obviated by culture indeed our ancestry

continues to place pressures on individuals and their sociocultural creations Not just an exercise in history this pathbreaking book dispels many myths about the beginning of society to gain new understandings of the many pressures on societies today

Evolutionary Creation Denis O Lamoureux,2009-02-26 In this provocative book evolutionist and evangelical Christian Denis O Lamoureux proposes an approach to origins that moves beyond the evolution versus creation debate **Biosocial**

Evolutionary Analysis Jonathan H. Turner,Alexandra Maryanski,2024-01-18 This authoritative book proposes a methodological and theoretical strategy for developing sociological explanations of the socio cultural universe Jonathan H Turner and Alexandra Maryanski discuss the problems that persist in explaining the socio cultural universe using only biological and psychological approaches and outline new strategies for understanding the evolution of human beings and their biological nature **The Emergence and Evolution of Religion** Jonathan Turner,Alexandra Maryanski,Anders

Klostergaard Petersen,Armin W. Geertz,2017-08-10 Written by leading theorists and empirical researchers this book presents new ways of addressing the old question Why did religion first emerge and then continue to evolve in all human societies The authors of the book each with a different background across the social sciences and humanities assimilate conceptual leads and empirical findings from anthropology evolutionary biology evolutionary sociology neurology primate behavioral studies explanations of human interaction and group dynamics and a wide range of religious scholarship to construct a deeper and more powerful explanation of the origins and subsequent evolutionary development of religions than can currently be found in what is now vast literature While explaining religion has been a central question in many disciplines for a long time this book draws upon a much wider array of literature to develop a robust and cross disciplinary analysis of religion The book remains true to its subtitle by emphasizing an array of both biological and sociocultural forms of selection dynamics that are fundamental to explaining religion as a universal institution in human societies In addition to Darwinian selection which can explain the biology and neurology of religion the book outlines a set of four additional types of sociocultural natural selection that can fill out the explanation of why religion first emerged as an institutional system in human societies and why it has continued to evolve over the last 300 000 years of societal evolution These sociocultural forms of natural selection are labeled by the names of the early sociologists who first emphasized them and they can be seen as a necessary supplement to the type of natural selection theorized by Charles Darwin Explanations of religion that remain in the shadow cast by Darwin's great insights will it is argued remain narrow and incomplete when explaining a robust sociocultural phenomenon like religion **Roald Dahl's Marvellous Medicine** Tom Solomon,2016-09-13 Most people know Roald Dahl as a famous write

of children's books and adult short stories but few are aware of his fascination with medicine Right from his earliest days to the end of his life Dahl was intrigued by what doctors do and why they do it During his lifetime he and his family suffered some terrible medical tragedies Dahl nearly died when his fighter plane went down in World War II his son had severe brain injury in an accident and his daughter died of measles infection of the brain But he also had some medical triumphs he

dragged himself back to health after the plane crash despite a skull fracture back injuries and blindness he was responsible for inventing a medical device the Wade Dahl Till valve to treat his son s hydrocephalus water on the brain and he taught his first wife Patricia to talk again after a devastating stroke His medical interactions clearly influenced some of his writing for example the explosive potions in George s Marvellous Medicine And sometimes his writing impacted on events in his life for example the research on neuroanatomy he did for his short story William and Mary later helped him design the valve for treating hydrocephalus In this unique book Professor Tom Solomon who looked after Dahl towards the end of his life examines Dahl s fascination with medicine Taking examples from Dahl s life and illustrated with excerpts from his writing the book uses Dahl s medical interactions as a starting point to explore some extraordinary areas of medical science Solomon is an award winning science communicator and he effortlessly explains the medical concepts underpinning the stories in language that everyone can understand The book is also peppered with anecdotes from Dahl s late night hospital discussions with Solomon which give new insights into this remarkable man s thinking as his life came to an end Божественный отбор Валерий Стерх,2022-11-25 *American Book Publishing Record* ,2005
