Biological Metaphor And Cladistic Classification An Interdisciplinary Approach:

Biological Metaphor and Cladistic Classification Henry M. Hoenigswald, Linda F. Wiener, 1984 **Ancestors and Relatives** Eviatar Zerubavel, 2012-01-26 Noted social scientist Eviatar Zerubavel casts a critical eye on how we trace our past individually and collectively arguing that rather than simply find out who our ancestors are from genetics or history we actually create the stories that make them our ancestors **Metaphor II** Jean-Pierre Noppen, Edith Hols, 1990-01-01 Metaphor though not now the scholarly mania it once was remains a topic of great interest in many disciplines albeit with interesting shifts in emphasis Warren Shibles Metaphor An Annotated Bibliography and History Bloomington Ind 1971 recorded the initial interest Then Metaphor A Bibliography of Post 1970 Publications published by John Benjamins continued the record through the mania years up to 1985 when writings proliferated as metaphor was seen to be a fundamental category in human thought and language Five years later there is a need for a report on the newest thinking and tendencies in the field This need is fulfilled by Metaphor II which offers a comprehensive view of information which would otherwise remain scattered throughout a numbing plethora of resources including many sometimes hard to find publications from Eastern Europe Metaphor II systematically collects references of books articles and papers published between 1985 and May 1990 and includes for completeness corrections and additions to the earlier bibliographies Abstracts are given for many of the titles while four indices disciplines semantic fields metaphor theory and names multiply the number of access points to the information **Friedrich Max Müller and the Role of Philology in Victorian Thought** John R. Davis, Angus Nicholls, 2019-05-16 The German comparative philologist Friedrich Max Müller 1823 1900 was one of the most influential scholars in Victorian Britain Müller travelled to Britain in 1846 in order to prepare a translation of the Rig Veda This research visit would turn into a lifelong stay after Müller was appointed as Taylor Professor of Modern Languages at Oxford in 1854 Müller's activities in this position would exert a profound influence on British intellectual life during the second half of the nineteenth century his book length essay on Comparative Mythology 1856 inspired evolutionist thinkers such as Herbert Spencer and Edward Burnett Tylor and made philology into one of the master sciences at mid century his debates with Charles Darwin and his followers on the origin of language constituted a significant component of religiously informed reactions to Darwin's ideas about human descent his arguments concerning the interdependence of language and thought influenced fields such as psychology neurology paediatrics and education until the end of the nineteenth century his theories concerning an Aryan language that purportedly predated Sanskrit and ancient Greek led to controversial debates on the relations between language religion and race in the Indian subcontinent and beyond and his monumental 50 volume edition of the Sacred Books of the East helped to lay the foundations for the study of comparative religion Müller's interlocutors and readers included people as various as Alexander von Humboldt Darwin George Eliot Matthew Arnold Friedrich Nietzsche Ferdinand de Saussure Ernst Cassirer Mohandas K Gandhi and Jawaharlal Nehru This volume offers the most

comprehensive and interdisciplinary assessment of M ller s career to date Arising from a conference held at the German Historical Institute in London in 2015 it brings together papers by an international group of experts in German studies German and British history linguistics philosophy English literary studies and religious studies in order to examine the many facets of M ller s scholarship This book was originally published as a special issue of the Publications of the English Goethe Society

The Philosophy and Science of Language Ryan M. Nefdt, Carita Klippi, Bart Karstens, 2021-03-30 This volume brings together a diverse range of scholars to address important philosophical and interdisciplinary questions in the study of language Linguistics throughout history has been a conduit to the study of the mind brain societal structure literature and history itself The epistemic and methodological transfer between the sciences and humanities in regards to linguistics has often been documented but the underlying philosophical issues have not always been adequately addressed With 15 original and interdisciplinary chapters this volume therefore tackles vital questions relating to the philosophy history and theoretical interplay between the study of language and fields as varied as logic physics biology classical philology and neuroscience With a four part structure questions of the mathematical foundations of linguistics links to the natural sciences cognitive implications and historical connections take centre stage throughout the volume The final chapters present research related to the linguistic connections between history philosophy and the humanities more broadly Advancing new avenues of research this volume is exemplary in its treatment of diachronic and cross disciplinary interaction and will be of interest to all scholars interested in the study of language

Beyond Cladistics David M. Williams, Sandra Knapp, 2010-10-28 Cladistics or phylogenetic systematics an approach to discovering unraveling and testing hypotheses of evolutionary history took hold during a turbulent and acrimonious time in the history of systematics During this period the 1960s and 1970s much of the foundation of modern systematic methodology was established as cladistic approaches became widely accepted Virtually complete by the end of the 1980s the wide perception has been that little has changed This volume vividly illustrates that cladistic methodologies have continued to be developed improved upon and effectively used in ever widening analytically imaginative ways

The Metaphoric Process Gemma Corradi Fiumara, 2005-08-16 Metaphor is much more than just a linguistic phenomena argues Gemma Corradi Fiumara it is in fact the key process by which we construct and develop our ability to understand the world and the people we share it with Rationality as understood by philosophers has led to a disembodied view of ourselves in which interaction between life and language has been downplayed By looking at the metaphoric process in an interpersonal rather than a formal way its importance in allowing us access to new worlds of experience is revealed The metaphoric potential in us all exposes us to the world and initiates our involvement in it

The Future of Phylogenetic Systematics David Williams, Michael Schmitt, Quentin Wheeler, 2016-07-21 Willi Hennig 1913 76 founder of phylogenetic systematics revolutionised our understanding of the relationships among species and their natural classification An expert on Diptera and fossil insects Hennig s ideas were applicable to all organisms He wrote about the

science of taxonomy or systematics refining and promoting discussion of the precise meaning of the term relationship the nature of systematic evidence and how those matters impinge on a precise understanding of monophyly paraphyly and polyphyly Hennig s contributions are relevant today and are a platform for the future This book focuses on the intellectual aspects of Hennig s work and gives dimension to the future of the subject in relation to Hennig s foundational contributions to the field of phylogenetic systematics Suitable for graduate students and academic researchers this book will also appeal to philosophers and historians interested in the legacy of Willi Hennig Placing Middle English in Context Irma Taavitsainen,Terttu Nevalainen,Päivi Pahta,Matti Rissanen,2011-10-31 No detailed description available for Placing Middle English in Context **Reconsidering Extinction in Terms of the History of Global Bioethics** Stan Booth,Chris Mounsey,2021-04-21 Reconsidering Extinction in Terms of the History of Global Bioethics continues the Routledge Advances in the History of Bioethics series by exploring approaches to the bioethics of extinction from disparate disciplines from literature to social sciences to history to sustainability studies to linguistics Van Rensselaer Potter coined the phrase Global Bioethics to define human relationships with their contexts This and subsequent volumes return to Potter s founding vision from historical perspectives and asks how did we get here from then Extinction can be understood in terms of an everlasting termination of shape form and function however until now life has gone on Where would we humans be if the dinosaurs had not become extinct And we still manage to communicate only not in proto Indo European but in a myriad of languages some more common than others The answer is simple after extinction events evolution continues But will it always be so Has the human race set planet earth on a collision course with nothingness This volume explores areas of bioethical interpretation in relation to the complex concept of extinction
