Phytochemical Resources for Medicine and Agriculture H.N. Nigg,D. Seigler,2013-06-29 This book was the result of a symposium held at the American Chemical Society meeting in Miami Beach Florida September 10 15 1989 The symposium was jointly sponsored by The Society for Economic Botany and the American Chemical Society Food and Natural Product sub division There were five speakers During the social sessions mostly over drinks in a hotel room it became obvious that regardless of the discipline we were all speaking the same language Yet prior to the symposium only a few of the participants knew one another We decided to expand the symposium into a book The book would help accomplish for others what we had discovered in ourselves That is the field of Natural Products is broad but similar in techniques and approach ancient but modern and has been and continues to be extremely valuable to humankind We wanted the book to serve as an introductory text for courses and as a reference work for the future We also determined to include the structure of every chemical in the chapter where it was mentioned so the reader would not have to find the structure somewhere else or to try and deduce the structure from the chemical name Little did we know what an undertaking these goals would be or the time this would take
