WEATHERLEY, 2013-10-22 The use of biotechnology in chemical synthesis offers up numerous advantages to the engineer in the process industries but it also presents a number of fundamental challenges and difficulties which impinge directly on separation process requirements The use of biochemical separations has grown significantly during the past decade and is especially used in process industries such as healthcare and food processing However it is becoming increasingly more important in areas such as recycling and waste water treatment and as industry shifts towards cleaner processes biochemical separations will continue to grow The two main objectives of this book are to focus on the application of existing separation process techniques to the recovery and purification of biologically derived products and to examine the state of knowledge of new techniques which have future potential Within these objectives the complexities and breadth of problems associated with biological separations are discussed specific engineering techniques are featured and their adaptation to biochemical separations are highlighted Forthcoming Books Rose Arny, 1993 **Bioseparation** G.T. Tsao, 2013-10-03 *Bioseparation* Georges Belfort, 1992 **Principles Of Bioreseparations Engineering** Raja Ghosh, 2006-10-23 Bioreseparations engineering deals with the scientific and engineering principles involved in large scale separation and purification of biological products It is a key component of most chemical engineering biotechnology bioprocess engineering programmes This book discusses the underlying principles of bioreseparations engineering written from the perspective of an undergraduate course It covers membrane based bioreseparations in much more detail than some of the other books on bioreseparations engineering Based largely on the lecture notes the author developed to teach the course this book is especially suitable for use as an undergraduate level textbook as most other textbooks are targeted at graduate students **Bioseparation** G.T. Tsao, 2014-03-12 Bioseparation Engineering Ajay Kumar, Abhishek Awasthi, 2009 Bioreseparation Engineering is meant for undergraduate and the postgraduate student community pursuing careers in Life Sciences It concentrates on the more recent methods and techniques for separating components and products of the
