Biology Its Principles And Implications

Garrett James Hardin

Biology Its Principles And Implications:

Biology Garrett James Hardin, 1966 **Biology** Garrett James Hardin, 1961 Breeding Contempt Mark A. Largent, 2011 From the Publisher Most closely associated today with the Nazis and World War II atrocities eugenics is sometimes described as a government orchestrated breeding program other times as a pseudo science and often as the first step leading to genocide Less frequently is it depicted as a movement having links to America a nation that has historically prided itself for its scientific rationality But eugenics does have a history in the United States a history that is largely the story of biologist Charles Davenport Davenport who led the Eugenics Records Office in the late nineteenth century provided physicians social scientists and lawmakers with the scientific data and authority that enabled them to coercively sterilize men and women who were thought to be socially deviant unfit to pass on their genes and unable to raise healthy children Moreover Mark A Largent shows how even in modern times remnants of eugenics philosophies persist in this country as certain public figures advocate a brand of birth control such as progesterone shots for male criminals that are only steps away from the castrations that were once performed *National Library of Medicine Catalog* National Library of Medicine (U.S.), 1960 Biology Garrett Hardin, 1966 *Green Tyranny* Rupert Darwall, 2019-03-26 Rupert Darwall s *Green Tyranny* traces the alarming origins of the green agenda revealing how environmental scares have been deployed by our global rivals as a political instrument to contest American power around the world Drawing on extensive historical and policy analysis this timely and provocative book offers a lucid history of environmental alarmism and failed policies explaining how scientific consensus is manufactured and abused by politicians with duplicitous motives and totalitarian tendencies Catalog United States Armed Forces Institute, 1971 **The Content Of Science: A Constructive Approach To Its Teaching And Learning** Peter J. Fensham; Richard F. Gunstone; Richard T. White all of Monash University, Australia., 2012-11-12 A group of science educators with experience of being involved in curriculum development and in conducting extensive research on many aspects of teaching and learning science have combined their findings in this volume Each author has conducted research into his or her own area of science education and presents the implications of this research for a specific area of science teaching The experiences of members of the Monash Children s Science Group specifically three primary teachers and one biology teacher have also been included so as to present the voices of teachers for whom writing a personal account of their teaching is often an unappealing task *The Content Of Science: A Constructivist Approach To Its Teaching And learning* Australia. Peter J. Fensham; Richard F. Gunstone; Richard T. White all of Monash University, 2013-11-26 First published in 1994 Leading scholars in science education from eight countries on four continents and expert practising science teachers primary and secondary wrote about the teaching and learning of particular science content or skills and hence how different science content requires different sorts of teaching and learning Having shared the papers they then met to discuss them and subsequently revised them The result is a coherent set of chapters that share valuable insights

about the teaching and learning of science Some chapters consider the detail of specific topics e g floating and sinking soil and chemical change some describe innovative procedures others provide powerful theory Together they provide a comprehensive analysis of constructivist learning and teaching implications
