Biplane To Monoplane Aircraft Development 1919 1939:

Biplane to Monoplane Ken Munson, 1997-06 This is a study of aircraft from biplanes to monoplanes between the years 1919 39 The book is part of a 12 volume series which covers the production and operation of aircraft worldwide **Biplane to Monoplane**, 1997 Explores the the Golden Age of Aviation Military Aircraft, 1919-1945 Justin D. Murphy, Matthew A. McNiece, 2008-12-08 An in depth history of the time when airpower became the great equalizer changing military strategy forever and bringing once safe targets in reach Military Aircraft 1919 1945 An Illustrated History of Their Impact covers a crucial era in modern warfare technology Ranging from the development of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II it provides an expert summing up of the decades when the use of aircraft in battle came of age In chapters covering both the history of air power and specific types of aircraft fighters bombers reconnaissance and auxiliary planes Military Aircraft 1919 1945 introduces key theorists and designers describes important changes in technology and production and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea They will also see how the expansion of war to the skies brought economic opportunity to some home fronts and looming terror and devastation to others **The RAF and Aircraft Design, 1923-1939** Colin Sinnott, 2001 This work describes the vital role of the Air Ministry in the development of the RAF's fighters and bombers before WWII **The RAF and Aircraft Design** Colin S Sinnott, 2014-05-22 This work examines the evolution of the RAF's operational requirements for its home defence air force for bombers to mount a deterrent counter offensive and for fighters to provide direct defence of Britain It discusses the management processes policies and decisions relevant to operational requirements on the basis of a detailed study of Air Ministry papers of the time By tracing the development of operational requirements the author exposes the thinking behind the RAF's quest for effective fighter and bomber aircraft He describes the ideas and concepts of air warfare that were adopted in the 1920s and shows how these evolved into the Air Staff's requirements for the aircraft which the RAF entered and fought in World War II **One Hundred Years of Air Power and Aviation** Robin Higham, 2003 In this precise interpretive and informative volume Higham looks at everything from the roots of strategic bombing and tactical air power to the lessons learned and unlearned during the invasion of Ethiopia the war in China and the Spanish Civil War He also considers the problems posed by jet aircraft in Korea and the use of Patriot missiles in the Persian Gulf He covers anti guerrilla operations doctrine industrial activities and equipment as well as the development of commercial airlines *Unflinching Zeal* Robin Higham, 2012-09-15 This consequential work by a pioneer aviation historian fills a significant lacuna in the story of the defeat of France in May June 1940 and more fully explains the Battle of Britain of July October of that year and the influence it had on the Luftwaffe in the 1941 invasion of the USSR Robin Higham approaches the subject by sketching the story and status of the three air forces the Arm e de l Air the Luftwaffe and the

Royal Air Force their organization and preparation for their battles He then dissects the the campaigns their losses and replacement policies and abilities He paints the struggles of France and Britain from both the background provided by his recent *Two Roads to War From Versailles to Dunkirk* NIP 2012 and from the details of losses tabulated by *After the Battle s The Battle of Britain* 1982 2nd ed and Peter Cornwell s *The Battle of France Then and Now* 2007 as well as in Paul Martin s *Invisible Vainqueurs* 1990 and from the Luftwaffe summaries in the British National Archives Cabinet papers One important finding is that the consumption and wastage was not nearly as high as claimed The three air forces actually shot down only 19 percent of the number claimed In the RAF case in the summer of 1940 44 percent of those shot down were readily repairable thanks to the salvage and repair organizations This contrasted with the much lower 8 percent for the Germans and zero for the French Brave as the aircrews may have been the inescapable conclusion is that awareness of consumption wastage and sustainability were intimately connected to survival
