

Biological Control

Biological control, or biocontrol, refers to the use of natural organisms, like beneficial insects, mites, and micro-organisms (such as bacteria, fungi, viruses, and nematodes) to control pests.

PlantwisePlus advocates for lower-risk plant protection practices and products, including biocontrol, and supports farmers to implement these safer solutions to protect their crops and the environment.

biocontrol

Crop management practices that maintain or increase populations of existing biocontrol agents, for example through providing shelter and more nectar plants.

The ongoing application of beneficial organisms to control pests, often using commercially available species.

The introduction of a non-native natural enemy to control an invasive pest. Once released, the agent self-replicates, providing permanent control.
