Bioterrorism A Guide For First Responders:

Bioterrorism Imaginatics Staff, 2003-04 Bioterrorism A Guide for First Responders With the threat of biological terrorism rising greater everyday the United States has taken numerous steps to prepare for a possible biological attack on our home soil. Ironically even with the greatest advancements in technology some of the best solutions are still low tech including an easily accessible field guide of information for first responders in case our vast network of electronic resources are not available. A research team with Imaginatics Publishing a Springfield Illinois based company has written and published the handbook **Bioterrorism A Guide for First Responders** which provides a detailed and easily accessible review of the 12 potential biological agents that could be used by terrorists along with the steps that should be followed by first responders to identify and treat victims. The guide is designed for all first responders to easily carry with them in the field and distinguishes itself from other bioterrorism books with a number of unique characteristics. All of which improve its durability or help to increase the speed at which information is accessed.

Characteristics

- 1 It has the concise action oriented information responders need. The book layout which consists of detailed bulleted lists that allow even rookie first responders to get vital information in a matter of seconds. Compared to other biological preparation books that flood you with over 200 pages of background and other non essential information **Bioterrorism A Guide for First Responders** consists of under 50 pages of only vital information.
- 2 It is easy to use. Placement of the contents on the front cover and the use of 1 2 inch tabs on the right hand side of the book helps improve rapid access to the different sections. The guide is also ring bound along the left side to improve the ability to flip through each section freely.
- 3 It is durable. The guide is printed on thin durable laminated pages that are tear and water resistant which ensures the guide's durability in the field.

Research Team

Research for the guide was headed by the Imaginatics Publishing staff and John Kucan M D. The Imaginatics team brings a range of medical experience including over 14 years of working in the medical field and training physicians healthcare workers and first responders. Currently Imaginatics is producing a training CD ROM for Illinois Department of Public Health employees on steps to identify and treat Plague as well as continuing education CD ROMs for NAACCR which are being funded through the CDC. Mark Verduin President of Imaginatics Publishing and Thomas Zoschke Vice President have both worked over 10 years at Southern Illinois University School of Medicine before joining Imaginatics where they were honored with national awards for training programs they created.
